Micellar water

Micellar water is a mild cleanser that dissolves makeup and skin impurities, while maintaining the balance of hydrolipid membrane. Does not dry the skin and does not irritate the lacrimal glands.

Indications: for all skin types and daily use, removal of decorative cosmetics and a make-up from eyes.

Ingredients: aqua, soft surfactants, cucumber extract, glycerin.

Scope: professional and home care.

Method of application: apply liquid to a cotton pad; clean the skin of the face, not excluding the area around the eyes. Repeat the procedure until the cotton pad is clean. Wash off with warm water.

Consumption for 1 procedure: 3 ml.

Dosage form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Cleansing makeup remover gel

It cleans, produces an anti-inflammatory, antiseptic and drying effect, removes excess sebum, tightens pores, regulates the work of sebaceous glands; flatten the skin, restores normal pH levels.

Indications: oily and combination skin, and also for all skin types by indications.

Ingredients: soft surfactants, coconut oil derivatives, fir oil, birch buds extract, bisabolol, triclosan, tea tree oil.

Scope: professional and home care.

Method of application: apply a small amount of gel on the pre-moistened skin of the face, massage it with light movements. Wash off with warm water.

Consumption for 1 procedure: 3 ml.

Dosage form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Cleansing universal gel with collagen

Ingredients: purified water, sodium laureth sulfate, plantapon PSC, aloe extract, cocamidopropyl betaine CAPB, food sorbitol, glycerin, genagen, lamesoft, D-panthenol, natural preservative, bur-marigold oil, collagen.

Scope: professional and home care.

Method of application: apply a small amount of gel to the pre-moistened skin of the face, neck and decollete area, massage it with light movements.

Wash off with warm water.

Dosage form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Make-up remover gel with AHA & BHA acids **NEW !!!**

Ingredients (INCI): aqua, coco glucoside, disodium laurylsulfosuccinate glycerin, coco glucoside, glyceryl oleate, vaccinium myrtillus (bilberry) fruit extract, citrus aurantium dulcis (orange) fruit extract, citrus limon (lemon) fruit extract, mandelic acid, lactic acid, glycolic acid, lactobionic acid, salicylic acid, allantoin, panthenol, tartaric acid, malic acid, parfum, benzyl alcohol, benzoic acid, dehydroacetic acid.

Scope: professional and home care.

Method of application: apply a small amount of gel on the pre-moistened skin of the face, massage it with light movements. Wash off with warm water.

Consumption for 1 procedure: 3 ml.

Dosage form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml

Make-up remover gel with AHA & BHA acids “Man” **NEW !!!**

Ingredients (INCI): aqua, coco glucoside, disodium laurylsulfosuccinate, glycerin, coco glucoside, glyceryl oleate, vaccinium martillus (bilberry) fruit extract, citrus aurantium dulcis (orange) fruit extract, citrus limon (lemon) fruit extract, mandelic acid, lactic acid, retinol (vitamin A), glycolic acid, lactobionic acid, salicylic acid, allantoin, panthenol, tartaric acid, malic acid, parfum “Man”, benzyl alcohol, benzoic acid, dehydroacetic acid.

Scope: professional and home care.

“Anti-couperosis” cleansing mousse with aloe vera for sensitive skin

The soft textured mousse is specially designed for skin care with rosacea, as well as sensitive skin, which is very sensitive to any external irritants. The bioactive formula of the mousse gently cares for the skin of the face, eliminating redness and superficial inflammation, strengthening the walls of blood vessels. All components of this product were carefully selected in order to exclude the possibility of a negative skin reaction after washing.

Indications: couperosis, sensitive skin, irritated skin, stressed skin, as well as for all skin types according to indications.

Ingredients: purified water, chamomile extract, aloe vera extract, panthenol, horse chestnut extract, rutin, ascorbic acid, polyquaternium-10, lemon acid, sorbitan caprylate.

Scope: professional and home care.

Method of application: apply a small amount of mousse with massage movements on the pre-moistened skin of the face, neck and decollete. Foam it and rinse well with warm water.

Consumption for 1 procedure: 2 ml.

Dosage form: bottle with dispenser 150 ml.

Cleansing mousse with collagen for sensitive skin

Cleansing mousse contains a complex of moisturizing, toning, and anti-inflammatory and immunomodulating components. It does not contain aggressive, surface-active substances (surfactants). Due to physiological pH, it is suitable for hypersensitive skin. Laminaria, fucus, and collagen extracts promote enhanced cellular regeneration, acting as a softening, moisturizing, and soothing agent. It reduces roughness, makes the skin supple and maintains its tone in good condition.

Indications: sensitive skin, irritated skin, stressed skin, as well as for all skin types according to indications.

Ingredients: mild surfactant, glycerin, panthenol, kelp extract, fucus extract, collagen.

Scope: professional and home care.

Method of application: apply a small amount of mousse with massage movements to the previously moisturized face skin. Foam it and rinse well with warm water.

Consumption for 1 procedure: 2 ml.

Dosage form: bottle with dispenser 150 ml.

Extra moisturizing cleansing mousse with fucogel for all skin types

It is an active moisturizing cleansing mousse for facial cleansing with fucogel for day care. The gentle formula of the mousse provides deep pore cleansing, effectively removes make-up and gives an incredible feeling of freshness and comfort after use. The mousse guarantees a triple effect: intensive moisturizing, delicate cleansing and protection of the epidermal barrier.

Indications: all skin types, incl. sensitive.

Ingredients: purified water, fucogel, D-panthenol, Beta-1,3 - glucan, polyquaternium-10, white tea extract, lotus extract, jasmine extract, allantoin, mannan cognac, lactic acid.

Scope: professional and home care.

Method of application: apply a small amount of mousse with massage movements on the entire surface of the pre-moistened skin of the face, neck and décolleté. Foam it and rinse well with warm water.

Consumption for 1 procedure: 2 ml.

Dosage form: bottle with dispenser 150 ml.

Cleansing mousse before mesotherapy and other traumatic procedures with Aloe Vera and tea tree

It is suitable for cleaning before mesotherapy and other injection treatments and cosmetic cleaning. It is used to care for problem skin. Make sure to rinse with purified water or tonic.

Indications: all skin types, incl. sensitive.

Ingredients: glycerin, sodium methyl cocoyl teaurate, sucrose, arginine cocoate, salicylic acid, aloe vera extract, gentian extract, caffeine, kelp extract, algae extract, tea tree oil, sodium phosphate, dimethicone copolyol, sodium citrate, chlorhexidine, phenoxyethanol.

Scope: professional and home care.

Method of application: apply a small amount of mousse with massage movements on the entire surface of the pre-moistened skin of the face, neck and décolleté. Foam it and rinse well with warm water.

Consumption for 1 procedure: 2 ml.

Dosage form: bottle with dispenser 150 ml.

Cleansing mousse for men with AHA acid & collagen

It is ideal for men's skin. The mousse has excellent cleansing properties, copes with pore pollution, leaving no feeling of tightness. It gently softens, soothes the skin, and prevents the occurrence of irritation, redness and inflammation. It gives the skin a feeling of absolute freshness.

Indications: for all types of men's skin. It is for daily washing in the morning and in the evening.

Ingredients: purified water, AHA-acid, cocoamide, cocoamidopropyl betaine, plantapon, glycerin, allantoin, D-panthenol, collagen, nipagard.

Scope: professional and home care.

Method of application: apply a small amount of mousse with massage movements on the entire surface of the pre-moistened skin of the face. Foam it and rinse well with warm water.

Attention! Do not use mousse after shaving.

Consumption for 1 procedure: 2 ml.

Dosage form: Bottle with dispenser 150 ml.

Mousse for intimate hygiene with AHA-acids pH=5,2

This is a mild cleanser for intimate hygiene based on plant extracts and natural AHA-acids. Provides a soft and delicate cleansing of the intimate and sensitive areas, it gives a light refreshing effect, neutralize pathogens and provides a pleasant sensation of freshness for a long time.

Ingredients: water, extract of camomile flowers, coco betaine, coco-glucoside (and) disodium lauryl sulphosuccinate (and) glycin, mandelic acid, lactic acid, retinol (vitamin A), phytic acid, glycolic acid, allantoin, panthenol, acacia flower extract, camellia extract, perfume, triethanolamine, benzyl alcohol, benzoic acid, dihydroacetic acid.

Indications: hygiene of intimate zones, preparation for depilation procedures and sugaring, pre-peeling preparation of intimate areas.

Scope: professional and home care.

Method of application: apply a small amount of mousse onto pre-wetted areas of the body, lather and rinse with warm water. It is suitable for daily hygiene.

Consumption for 1 procedure: 3 ml.

Dosage form: bottle with dispenser 150 ml.

Moisturizing milk with fucogel

It delicately removes excess cosmetics and dirt. In addition to a longlasting feeling of freshness and purity, it also provides the skin with complete care. The fucogel which is a part of cream moistens skin from within and outside. Makes it silky and delicate, gives a feeling of comfort. It protects against aggressive environmental influences.

Indications: for all skin types and daily use, as well as for removing makeup from the eye area.

Ingredients: grape seed oil, chamomile oil, lactic acid, fucogel, azulene, chamomile extract, bisabolol.

Scope: professional and home care.

Method of application: apply a small amount of the product to the skin of the face, neck and décolleté area, massage it gently. Wash off with warm water.

Tonics with AHA acids

Thanks to the fruit acids that are included in the composition, tonics have a tonic effect, clean the skin surface, exfoliate the epidermis flakes, and increase the penetrating ability of skin care cosmetics. Tonics also moisturize, have an antioxidant and bactericidal effect. They are an excellent prepiling agent.

Indications: hyperkeratosis, seborrhea, porous contaminated skin, also fading dull skin with pigmentation and wrinkles. It is the first stage of pre-peeling preparation.

Contraindications: individual intolerance, hypersensitivity of the skin, fresh injuries, and herpes sores.

Scope: professional and home care.

How to use: After cleansing, wipe the face with a cotton pad; avoid the area around the eyes.

Attention!

- apply tonic only in the evening with the obligatory use of SPF-product during the day
- if your care contains agents containing retinoids, it is not recommended to use cosmetics with a drying and irritating effect on the skin at the same time, therefore, it is better to postpone the use of tonic with AHA acids until later when you are treated with retinoids.

Biotonic with fruit acids 5% pH 3.5

It has a tonic, antioxidant and bactericidal action. Cleans the surface of the skin, exfoliates the epidermis scales, increases the penetrating ability of cosmetics. It is an excellent prepiling agent.

Indications: hyperkeratosis, seborrhea, porous contaminated skin, also fading dull skin with pigmentation and wrinkles. The first stage of pre-peeling preparation for all skin types, including sensitive skin with signs of rosacea.

Ingredients: purified water, lactic acid, citric acid, tartaric acid, malic acid.

How to use: after cleansing, wipe the face with a cotton pad, avoiding the eye area.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 100 ml

Toner with AHA acids 8% pH 3.4

It has a tonic, antioxidant and bactericidal action. Cleans the surface of the skin, exfoliates the epidermis scales, increases the penetrating ability of cosmetics. It is an excellent prepiling agent.

Indications: hyperkeratosis, seborrhea, porous contaminated skin, also fading dull skin with pigmentation and wrinkles. The first stage of pre-peeling preparation.

Ingredients: AHA acid 8%, amino acid complex, allantoin, panthenol, chamomile extract, hamamelis extract.

How to use: after cleansing, wipe the face with a cotton pad, avoiding the eye area.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Toner with AHA acids 8% pH 4.3 "Classic"

It has a tonic, antioxidant and bactericidal action. They clean the surface of the skin, exfoliate the epidermal flakes, and increase the penetrating ability of cosmetic cosmetics. It is an excellent prepiling agent.

Indications: hyperkeratosis, seborrhea, porous contaminated skin, also fading dull skin with pigmentation and wrinkles. This is the first stage of pre-peeling preparation.

Ingredients: purified water, cocamidopropyl betaine, glycerin, propylene glycol, polyquaternium-10, glycolic acid, lactic acid, citric acid, malic acid, tartaric acid.

Scope: professional and home care.

How to use: after cleansing, wipe the face with a cotton pad; avoid the area around the eyes.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Tonic with AHA acids 10% pH 3.4

It has a tonic, antioxidant and bactericidal action. It cleans the surface of the skin, exfoliates the epidermal flakes, and increases the penetrating ability of skin care cosmetics. It is an excellent prepiling agent.

- during the procedure of skin toning: apply tonic with a brush or cotton pad on your face, let it soak. Do not flush.
- for home care: wipe the skin with a cotton sponge moistened by tonic. Do not flush. Then apply care and protection.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 100 ml

Hydrolates

Hydrolate is a concentrate collected after the distillation of plants. It contains a small amount of essential oil (0.1 - 0.5%) dissolved in water and other components that are not in essential oils. Hydrolates, preserving the properties of essential oils, have a more gentle effect and are safe to use on delicate areas of the body, as well as on skin prone to irritation.

Mode of application:

Use it as a skin cleanser before or after removing makeup. Due to the absence of an alcohol component, hydrolate does not dry the skin, but on the contrary, moisturizes and nourishes with beneficial substances. A low concentration of essential oils and other nutrients allows the use of hydrolate even on delicate and sensitive skin areas (including in the care of a child's skin) without causing irritation or allergies. In the summer heat or, when the air is dry, we recommend spraying hydrolate over the entire surface of the face and body several times a day. This will help refresh and maintain the water balance of the skin.

You can make ice cubes for washing in the morning from floral water. Such washing increases blood flow to the skin of the face (therefore, the skin begins to breathe better), tones it and helps to “wake up”. In this case, be sure to monitor the condition of your skin. For dry and sensitive skin will be enough 3-4 times a week, in case of oily and combination skin, you can wash with ice day and night.

Attention! This method of application is contraindicated in rosacea. Hydrolates are recommended to use at cultivation of masks for a face and hair, thereby increasing their efficiency. Some floral water (chamomile, sage, nettle) are great for hair care. Rinse hair after washing, or just spray the floral water on the hair during the day. Hydrolates can be used as a deodorant and light eau de toilette, as well as a component of homemade natural cosmetics (as a base for making creams, soaps).

One of the main tasks solved by hydrolates is moisturizing the skin before applying cosmetic oils and other cosmetic products. In addition to their own cosmetic properties, hydrolates serve as an excellent transport system for products applied over the top. Thus, moisturizing the skin with hydrolate, the effectiveness of cosmetics will increase. Always apply care products to pre-moistened skin with hydrolate or tonic.

Each hydrolate has its own properties, and you can always find something suitable for yourself.

Sage hydrolate

It has beneficial effects on oily and combination skin, regulates sebum production, mattes the skin. It has a pronounced beneficial effect on the hair. Strengthens them, stimulates growth, and adds shine.

Ingredients: 100% distillate rose hips of the first distillation

Indications: for all skin types, for daily use, after cleansing.

Method of application: after cleansing, apply hydrolate with a cotton pad on the face, neck and décolleté. Do not flush.

Consumption for 1 procedure: 3 ml

Product form: bottle with dispenser 100 ml, 200 ml.

Rosemary hydrolate

Rosemary hydrolate is an excellent antioxidant that protects the skin from the damaging effects of free radicals. Therefore, first of all, it is recommended to residents of large cities, whose skin is more often prone to stress factors. Rosemary water is especially useful for owners of oily skin, both young and with signs of age-related changes. It perfectly balances clears pustular and acne rash, eliminates sagging, deeply tones and fills with health. It enhances the effect of anti-cellulite products.

Ingredients: rosemary hydrolate of the first distillation

Indications: for all skin types, for daily use, after cleansing.

Method of application: after cleaning apply hydrolate with a cotton pad on skin of the face, neck and décolleté. Do not flush.

Consumption for 1 procedure: 3 ml

Release form: bottle of 100 ml

Lemon hydrolate

Lemon hydrolate is a real panacea for oily and acne prone skin. If you use it as a tonic, the effect will not slow down to appear as a narrowed pores, smoothed skin relief. It perfectly disinfects and heals minor injuries, brightens age spots, freckles. It is an indispensable product in the fight against acne and pimples.

Ingredients: 100% lemon hydrolate. It doesn't contain alcohol and preservatives.

Indications: for all skin types, for daily use, after cleansing.

Method of application: after cleansing, apply hydrolate with a cotton pad on the face, neck and décolleté. Do not flush.

Consumption for 1 procedure: 3 ml

Product form: 100 ml dispenser bottle.

Green tea hydrolate

Green tea hydrolate is an excellent antioxidant. It cares for the skin very gently and carefully, nourishing and softening it. It is ideal for the care of any type of skin, quickly and gently returning her life, softness and elasticity. It enriches the products for oily and inflamed skin, has an antiseptic, antibacterial and soothing effect. It works well for mature, dry and sensitive skin. It strengthens the processes of regeneration, protects and strengthens the thin skin. Green tea hydrolate is well accepted even by skin prone to allergic reactions.

Ingredients: 100% green tea hydrolate

Indications: for all skin types, for daily use, after cleansing.

Method of application: after cleansing, apply hydrolate with a cotton pad on the face, neck and décolleté. Do not flush.

Consumption for 1 procedure: 3 ml

Product form: 100 ml dispenser bottle.

Parsley hydrolate

It refreshes and whitens the skin; it is used in the fight against acne on the face and body. Parsley hydrolate is recommended for rubbing sensitive, irritated skin with dilated capillaries and for oily skin, used for whitening freckles, pigment spots. It has rejuvenating properties, refreshes the skin, protects against wrinkles, tones.

Ingredients: 100% parsley hydrolate. It is a product of steam distillation. It does not contain preservatives.

Indications: for all skin types, for daily use, after cleansing.

Method of application: after cleansing, apply hydrolate with a cotton pad on the face, neck and décolleté. Do not flush.

Consumption for 1 procedure: 3 ml

Product form: 100 ml dispenser bottle.

Echinacea hydrolate

It has an immunostimulating and antioxidant effect, it strengthens blood vessels, and reduces the appearance of acne.

Ingredients: Echinacea hydrolate of the first distillation.

Indications: for all skin types, including problem skin.

Method of application: after cleansing, apply with a cotton pad on the skin. Apply 2 times a day.

Scope: home and professional care.

Consumption for 1 procedure: 3 ml.

Coffee peeling 8% pH 3.4 **NEW !!!**

Coffee peeling is an excellent cosmetic product for skin care of any age, any type. It has pronounced anti-inflammatory and antioxidant properties. It promotes the restoration and preservation of skin elasticity, prevents the appearance of wrinkles and other signs of aging. The gentle texture of the product is easily distributed over the skin, and the crushed coffee beans gently slide over the face without damaging the epidermis. Its regular use will prevent premature aging of the skin, help rejuvenate faded skin and protect cells from destruction.

Ingredients: water, caffeic acid, olive oil, shea butter, ground coffee, cetearyl glucoside, sorbitan stearate, glyceryl stearate, cetearyl alcohol, coffee extract, triethanolamine, benzyl alcohol, benzoic acid, dehydrooxycic acid.

Indications: for all skin ranges.

Contraindications:

- allergic to coffee or its components;
- pregnancy and breastfeeding period;
- various skin diseases during exacerbations;
- the presence of wounds, cracks in the skin;
- lesions of the skin fungal infection;
- overly sensitive skin;

Scope: professional and home care.

Mode of application:

1. Massage onto dry and clean face (neck, décolleté), avoiding the area around the eyes and lips. Wait a few seconds, and then gently massage your face with circular movements.
2. Soak peeling 3-5 minutes before the beginning of a light tingling
3. Rinse thoroughly with purified water
4. Apply moisturizing (protective cream with SPF) by skin type:
 - optional moisturizing creams: Extra-moisturizing cream with fucogel and SPF 15 or Moisturizing fluid, or Cooling antiseptic gel after peeling with mint hydrolate.
 - sunscreens of choice: Sunscreen SPF 30, SPF 50, Extra Moisturizing Cream with fucogel and SPF 15, Cream-gel “Oil free” with SPF 30, Cream-gel “Oil free” with SPF 50).

Consumption for 1 procedure: 3 ml.

Release form: can of 30 ml, 50 ml, 100 ml, 200 ml, 300 ml

Kojic peeling of 30% pH 2.5 **NEW!!!**

The main component of the peeling is Kojic acid, which not only prevents the formation of pigment spots, but also fights against existing changes in the skin. With the help of a Kojic peeling, the horny layer of cells is delicately removed from the skin surface, on which dark pigment (melanin) is present. The result is effective lightening and rejuvenation of the skin.

Ingredients: water, kojic acid 19.5%, glycolic acid 10%, bearberry extract, carbomer, vitamin C, lactobionic acid 0.5%.

Indications:

- dry skin;
- photo aging;
- pigmentation;
- age changes.

Contraindications:

- individual intolerance;
- the presence of skin lesions in the intended areas of treatment;
- inflammatory and infectious skin diseases;
- severe acne, rosacea (papulopustular);
- herpes in active form;
- reception of systemic retinoids (in 5-6 months), topical (in 7-10 days);
- excessive skin insolation;
- skin is sensitive, dry, atrophic, thinned;
- pregnancy and lactation.

Scope: professional care.

Consumption for 1 procedure: 3 ml.

Product form: 10 ml, 25 ml, 50 ml, 100 ml dispenser bottle.

Ferulic peeling all-season light pH 3.4

Under the influence of ferulic acid, blood circulation in the capillaries is improved, their walls are strengthened. Consequently, the protective properties of the epidermis increase, connecting fibers are restored faster. Therefore, the use of ferulic acid is ideal at the first signs of aging of the skin and the appearance of fine wrinkles on the face.

Ingredients: ferulic acid, lactic acid, phloretin, carboxymethylcellulose.

Indications:

- atony (reduced tone) of the skin;
- poor microcirculation of the skin;
- uneven complexion;
- hyperpigmentation of some species;
- skin changes caused by biological and photoaging;
- increased skin dryness;
- acne disease I-II degree;
- post-acne condition (violation of skin relief).

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Enzymatic peeling pH 6.02

Enzyme peeling is a gentle procedure, suitable for all skin types, even with rosacea. Gently removes protein contamination from the skin, keratinization and secretions of sebum and sweat glands (greasy plugs). Makes skin radiant and clean. The mouths of the follicles are cleaned and the pores are tightened. Regularly apply this peeling to the skin with dilated pores and an imbalance of sebum production.

Ingredients: Essentialin, alkaline protease, sour protease.

As a result:

- improves complexion;
- skin relief is leveled, fine wrinkles are smoothed;
- pigmentation spots are lightened;
- pores are cleaned and narrowed;
- stimulates the process of regeneration of new cells.

After the procedure does not require rehabilitation, no peeling and hyperemia.

Consumption for 1 procedure: 6 ml

Release form: bottle of 25 ml, 50 ml, 100 ml.

Peeling lactobionic 5% pH 2.05

Lactobionic acid helps to saturate the skin with life-giving moisture. This is possible due to the ability of the acid to adsorb moisture and simultaneously retain the fluid obtained from the outside, in the skin, even with a long stay in adverse climatic conditions. After application of the acid, an aqueous film remains on the skin that prevents drying and the appearance of pruritus; the possibility of year-round use.

Ingredients: purified water, lactic acid 5%

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Milk peeling 25% pH 1.45

Lactic acid helps to saturate the skin with life-giving moisture. This is possible due to the ability of the acid to adsorb moisture and simultaneously retain the fluid obtained from the outside, in the skin, even with a long stay in adverse climatic conditions. After applying the acid, an aqueous film remains on the skin that prevents drying and itching; the possibility of year-round use.

Ingredients: purified water, lactic acid 25%.

Indications:

- severe dryness of the skin, which is accompanied by irritation, peeling, fine wrinkles;
- oily skin with dilated pores and acne.
- reduced skin tone and elasticity;
- epidermal pigmentation.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Peeling lactobionic 40% pH 2.0

Lactobionic acid helps to saturate the skin with life-giving moisture. This is possible due to the ability of the acid to adsorb moisture and simultaneously retain the fluid obtained from the outside, in the skin, even with a long stay in adverse climatic conditions. After applying the acid, an aqueous film remains on the skin that prevents drying and itching; the possibility of year-round use.

Ingredients: lactobionic acid 40%, purified water.

Indications:

- fading skin;
- reduced skin elasticity;
- the presence of hyperpigmentation;
- chrono- and photoaging of the skin;
- mimic wrinkles;
- skin inclination to inflammation;
- loss of a stable shape of the face;
- the presence of hyperpigmentation.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Peeling lactobionic 40% pH 1.3 **NEW !!!**

Lactobionic acid helps to saturate the skin with life-giving moisture. This is possible due to the ability of the acid to adsorb moisture and simultaneously retain the fluid obtained from the outside, in the skin, even with a long stay in adverse climatic conditions. After applying the acid, an aqueous film remains on the skin that prevents drying and itching; the possibility of year-round use.

Ingredients: lactobionic acid 40%, purified water.

Indications:

- fading skin;
- reduced skin elasticity;
- the presence of hyperpigmentation;
- chrono- and photoaging of the skin;
- mimic wrinkles;
- skin inclination to inflammation;
- loss of a stable shape of the face;
- The presence of hyperpigmentation.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Azelaic peeling pH 2.3

It has an antimicrobial effect on *Propionibacterium acnes* and *Staphylococcus epidermidis*. Product acts as a natural antioxidant and anti-inflammatory agent. It balances the processes of keratinization in the sebaceous glands of the skin of the face with their pronounced disorders, stimulates self-cleaning of the mouths of these glands, eliminating comedones and preventing the appearance of black dots.

Ingredients: azelaic acid 30%, salicylic acid 3%

Indications:

- Acne;

Consumption for 1 procedure: 3 ml

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Almond peeling pH 2.3

Advantages: no pronounced irritation. Gives the opportunity to control the process ; the possibility of using in the summer without the risk of pigmentation; efficacy in acne; possibility of use in the presence of rosacea; the gentle surface peeling effect makes it possible to apply it on any skin type, regardless of age.

Ingredients: almond acid 15%, lactic acid 5%, hydrolyzed almond proteins, allantoin, and panthenol.

Consumption per procedure: 3 ml.

Release form: bottle with dispenser 10 ml, 30 ml, 60 ml, 100 ml

Pyruvic peeling pH 4.0

Pyruvic peeling provides exfoliation without causing dry skin; uses the deep layers of the dermis; normalizes the secretion of the sebaceous glands; eliminates hyperpigmentation; provides a whitening effect.

No allergic reaction; greater efficiency; excellent portability.

Ingredients: ethanol, pyruvic acid, lactic acid, allantoin, D-panthenol, perfumery composition.

Indications:

- the effects of photo aging;
- the presence of enlarged pores;
- acne I-II degree;
- presence of seborrheic dermatitis;
- fading skin;
- stagnant stains;
- atonic skin;

Consumption for 1 procedure: 3 ml

Release form: bottle with dispenser 10 ml, 30 ml, 60 ml, 100 ml

Phytin peeling pH 4.2

It has been established that phytic acid, along with deep and very mild cleansing and exfoliating effects, characterized by the ability to inactivate the enzyme tyrosinase, the excessive production of which leads to hyperpigmentation. This determines the high antioxidant, lightening and anti-inflammatory properties of phytic acid, which contribute not only to effectively prevent the appearance of pigment spots, but also to the rapid elimination of existing ones.

Ingredients: purified water, phytic acid, lactic acid, bearberry extract, carboxymethylcellulose, allantoin, D-panthenol.

Indications:

- hyperpigmentation;
- photo aging;
- dehydrated and atonic skin;
- prevention of age-related changes;
- mimic wrinkles;

Consumption for 1 procedure: 3 ml

Release form: bottle with dispenser 10 ml, 30 ml, 60 ml, 100 ml

AHA-peeling 10% pH 1.0 fruit acids

Peeling fruit acids (they are also called alpha-acid acids or AHA-acids) refers to surface peels. Brightens the face, makes it smoother, softer and more elastic at the same time. When the first signs of aging appeared (shallow wrinkles, reduced tone), peeling with fruit acids is the method that can quickly and effectively correct the situation.

Ingredients: citric acid, malic acid, ascorbic acid, water.

Consumption for 1 procedure: 3 ml

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Gel with AHA acids 10% pH 2.5

It is for normal, combination, oily and fading skin. The gel effectively cleanses the skin without disturbing the pH balance, has anti-inflammatory and antiseptic. It cleans peels.

Ingredients: purified water, lactic acid, citric acid, tartaric acid, malic acid.

Indications: care for all skin types according to indications, pre-peeling preparation.

Scope: professional and home care.

Mode of application:

- professional care: it is recommended to use as a soft exfoliant before the beginning of the treatment procedure, especially anti-aging. After cleansing, gently apply the gel with a brush to the entire surface of the skin, excluding the area around the eyes. Tingling or tingling of the skin is possible. After 5-10 minutes, rinse with cool purified water and dry the skin.

- home care: the gel is prescribed as a pre-peeling preparation and for maintenance care between treatments. The drug is used 1 time per day, in the evening after makeup removal 1-2 times per week.

Consumption for 1 procedure: 3 ml

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml

“Easy summer” AHA - peeling 10% pH 3.0

This easy chemical peeling with AHA-acids is the first stage of the peeling program and an effective opportunity to increase the penetrating ability of cosmetic procedures. It deeply affects the epidermis, gently exfoliates dead cells and evens out the relief.

Ingredients: AHA acid 10%, purified water.

Indications: care for all skin types according to indications, pre-peeling preparation.

Contraindications: individual intolerance, hypersensitivity of the skin, fresh injuries, herpetic eruptions, taking retinoids.

Attention! Before use, apply a little on the fold of the elbow and on the area behind the lobe of the ear. Wait 20-25 minutes. In case of irritation, refuse further use of peeling.

Scope: professional and home care.

Mode of application:

- professional care: it is recommended to use as soft an exfoliant before the beginning of the procedure, especially anti-aging. After cleansing, gently apply the peeling solution with a cotton pad over the entire surface of the skin, excluding the area around the eyes. It may cause a tingling sensation. After 5-10 minutes, rinse with cool purified water and dry the skin.

- home care: peeling is prescribed as a pre-peeling preparation and for maintenance care between treatments. The drug is used 1 time per day, in the evening after makeup removal.

After cleansing, gently apply the peeling solution with a cotton pad over the entire surface of the skin, excluding the area around the eyes. It may cause a tingling sensation. After 5 minutes, rinse with cool purified water, and dry the skin. Then apply care products. During the period of solar activity, apply a cream with SPF protection on the recommendation of your cosmetologist.

Consumption for 1 procedure: 3 ml.

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

AHA-peeling 20% pH 1.52

It performs exfoliation of the stratum corneum of the epidermis, initiates active regeneration of the skin.

Ingredients: AHA acid 20%, purified water (glycolic acid 5%, lactic acid 5%, citric acid 5%, tartaric acid 4%, malic acid 1%).

Glycolic acids - basic, citric and lactic supplement the compositions, enhance the effect, reduce acidity and impart additional antioxidant and bactericidal properties to the agents. Apple in addition to exfoliating action stimulates cells, increasing cellular metabolism. Wine has whitening and moisturizing effect.

An acidic cocktail eats the ballast of outdated skin cells from its surface. In exchange application helps to weaken age spots and evens out color. Peeling the top layer of cells, fruit acids activate the mechanisms of protection and restoration of the skin.

Consumption for 1 procedure: 3 ml

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

AHA-peeling 25% pH 2.5

The skin gets a nice beautiful color, it becomes soft and silky. It stimulates the production of collagen in the skin.

Ingredients: 25% AHA acid, purified water (glycolic acid, lactic acid, citric acid, tartaric acid, malic acid), glycolic acid - basic, citric and lactic supplement the compositions, enhance the effect, reduce acidity and impart additional antioxidant and bactericidal properties to the agents. Apple in addition to exfoliating action stimulates cells, increasing cellular metabolism. Wine has whitening and moisturizing effect.

An acidic cocktail eats the ballast of outdated skin cells from its surface. In exchange application helps to weaken age spots and evens out color. Peeling the top layer of cells, fruit acids activate the mechanisms of protection and restoration of the skin.

Consumption for 1 procedure: 3 ml

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

AHA peeling 25% pH 1.3

The surface of the skin after application is smoothed; fine wrinkles and age spots disappear.

Also, this peeling is characterized by a mild keratolic effect on the skin; it dissolves the top, cornified layer of skin cells, providing a rejuvenating effect.

Ingredients: purified water, lactic acid, citric acid, tartaric acid, malic acid, glycolic acid - basic, citric and lactic supplement the compositions, enhance the effect, reduce acidity and impart additional antioxidant and bactericidal properties to the agents. Apple in addition to exfoliating action stimulates cells, increasing cellular metabolism. Wine has whitening and moisturizing effect.

An acidic cocktail eats the ballast of outdated skin cells from its surface. With coursework application helps to reduce pigment spots and evens out color. Peeling the top layer of cells, fruit acids activate the mechanisms of protection and restoration of the skin.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

AHA-peeling 50% pH 1.1

The complex for mature skin with fruit acids is a balanced combination of natural alpha-acids and their salts. Carefully selected composition of this cosmetic product helps to normalize the acid balance of the skin. This complex is used both in professional care lines for all types of skin, and at home.

Ingredients: citric acid, malic acid, ascorbic acid, purified water (glycolic acid, lactic acid, citric acid, tartaric acid, malic acid).

The use of fruit acids in high concentration allows activating the synthesis of collagen and elastin, which leads to a pronounced lifting effect, leveling the relief and improving the overall condition of the skin. The whitening effect is due to the active exfoliation and the direct action of acids on melanin of the skin.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 50 ml, 100 ml.

AHA-peeling 70% pH 0.79

After application of peeling, local skin immunity and cell regeneration are activated. The skin gets a nice beautiful color, it becomes soft and silky. It stimulates the production of collagen in the skin, restores skin elasticity, smoothes the first signs of age. Work of sebaceous glands is normalized. The skin gains freshness.

It produces deep exfoliation of the stratum corneum of the epidermis, initiates active skin regeneration. The surface of the skin after applying the complex smoothes out, fine wrinkles disappear, pigment spots are weakened.

Ingredients: citric acid, malic acid, ascorbic acid, purified water (citric acid 20%, lactic acid 20%, tartaric acid 15%, glycolic acid 10%, and malic acid 5%)

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

AHA-extract of 44% pH 1.4

This is a chemical peel, which is used for cleansing, healing and rejuvenation of the skin. Natural fruit acids promote exfoliation of superficial keratin scales, have a powerful moisturizing and moisture-holding effect, initiate active regeneration and give the skin renewal, softness and velvety. AHA-extract can have no less significant effect on mature skin, since it stimulates the synthesis of its own collagen, elastin and other important intercellular substance. After the course of procedures, fine wrinkles are smoothed, skin elasticity improves, pigmentation decreases and cellular renewal is activated.

Ingredients: glycolic acid, citric acid, lactic acid, tartaric acid, malic acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Salicylic peeling 20% pH 2.4 (gel)

Salicylic acid has keratolytic, anti-inflammatory and antiseptic effects. Salicylic acid practically does not irritate the skin and does not penetrate into its deep layers, which in turn reduces the possibility of side effects in the post-peeling period.

Ingredients: salicylic acid, citric acid, ethyl alcohol.

Indications:

- seborrheic dermatitis;
- acne 1-2 severity;
- folliculitis;
- excessive skin pigmentation;
- elimination of consequences after the treatment of acne;
- age-related skin aging and photo-aging.

Contraindications:

- pregnancy and lactation;
- Herpes in acute form;
- inflammatory processes;
- violation of the integrity of the skin;
- individual intolerance of components;
- hypersensitivity of the skin;
- Sunburns on the areas of skin on which it is supposed to do peeling.

Attention! Salicylic acid is incompatible with resorcinol and zinc oxide.

Therefore, if you are going to peel with this acid, avoid using preparations containing these components.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Salicylic peeling 28% pH 2.0

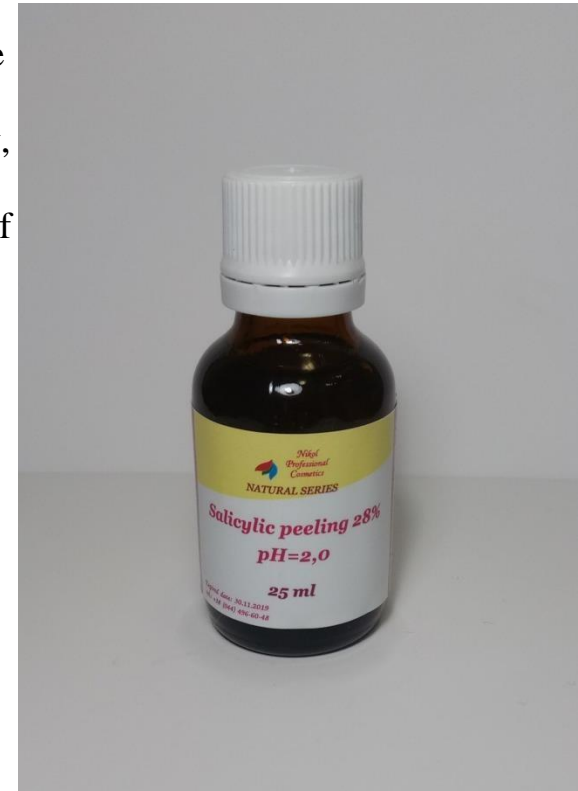

Salicylic peeling is an effective exfoliant that reduces the signs of aging and sun damage. It destroys the protein bonds between the skin layers and, as a result, the skin peels more quickly. The main purpose of salicylic peeling is to solve acne-prone skin problems. In addition, salicylic acid has a powerful anti-inflammatory, comedolytic and peeling action. Peeling based on it dries acne, dissolves the contents of blocked pores, relieves inflammation and normalizes the separation of sebum. The range of salicylic acid is not limited to the fight against rashes. Like other acids, it is used for rejuvenation, leveling the skin's relief, lightening pigmentation and as a preparatory base for deeper peels.

It requires pre-peeling preparation.

Ingredients: salicylic acid, citric acid, ethyl alcohol.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Salicylic peeling 30% extra pH 1.5

The use of this peeling has a positive effect on the structure of the epidermis, evens the relief and color of the skin. With it, you can significantly improve the condition of the skin, without resorting to surgical methods of rejuvenation. Salicylic peeling has a powerful antiseptic effect, as well as pronounced cleansing properties; it helps to normalize the work of the sebaceous glands and narrow pores. And it is also good because it works effectively with other types of peels that help in the treatment of oily, acne-prone skin.

Ingredients: ethyl alcohol, salicylic acid, citric acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 10% pH 2.8

The procedure of glycolic peeling is desirable and shown to almost everyone with the aim of leveling the skin relief, eliminating "wrinkles", biostimulating and moisturizing the skin.

Ingredients: glycolic acid 10% partially neutralized. Purpose: anti-aging, lightening / whitening, skin renewal, seborregulation.

Indications:

- seborrheic dermatitis;
- acne 1-2 severity;
- folliculitis;
- excessive skin pigmentation;
- elimination of the consequences after the treatment of acne;
- age-related skin aging and photo-aging.

Contraindications:

- pregnancy and lactation;
- herpes in acute form;
- inflammatory processes;
- violation of the integrity of the skin;
- individual intolerance to the components of the peeling;
- hypersensitivity of the skin;
- sunburns on the areas of skin on which you want to do peeling.

Attention! Salicylic acid is incompatible with resorcinol and zinc oxide. Therefore, if you are going to peel with this acid, avoid using preparations containing these components.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Salicylic peeling 30% pH 1.5 extra

The use of this peeling has a positive effect on the structure of the epidermis, evens the relief and color of the skin. With it, you can significantly improve the condition of the skin without resorting to surgical methods of rejuvenation. Salicylic peeling has a powerful antiseptic effect, as well as pronounced cleansing properties; it helps to normalize the work of the sebaceous glands and narrow pores. And it is also good because it works effectively with other types of peels that help in the treatment of oily, acne-prone skin.

Ingredients: ethyl alcohol, salicylic acid, citric acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 10% pH 2.8

The glycolic peeling procedure is desirable and is shown to almost everyone in order to smooth out the skin relief, eliminate “wrinkles”, biostimulate and moisturize the skin.

Attention! Conducting procedures only after special preparation!

Ingredients: glycolic acid 10% partially neutralized

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 10% pH 1.64

Glycolic peeling increases the permeability of the basement membrane - it opens "windows" through which the necessary substances for moisturizing, rejuvenating, lightening and toning enter the deep layers of the skin.

Ingredients: purified water, glycolic acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

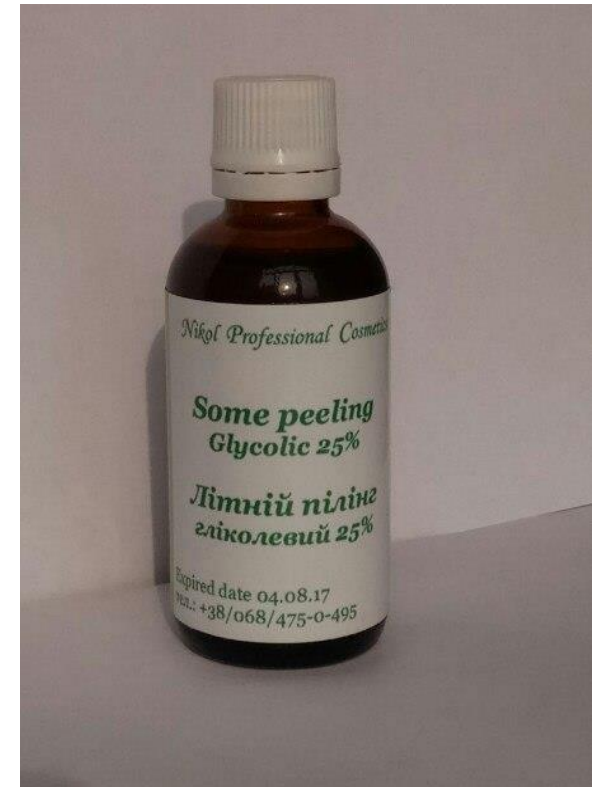

Summer glycolic peeling 25% pH 2.5

Glycolic acid has the smallest molecular weight, easily penetrates the epidermal barrier and has the most pronounced effect. It has the ability to reduce hyperpigmentation and stimulates cell regeneration.

Ingredients: Glycolic acid 25% partially neutralized.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 25% pH 1.5

Glycolic peeling increases the permeability of the basement membrane - it opens "windows" through which the necessary substances for moisturizing, rejuvenating, lightening and toning enter the deep layers of the skin.

Ingredients: purified water, glycolic acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 50% pH 1.64

Glycolic peeling also accelerates the cell cycle - the time it takes for the skin cell to pass from the deep layers to the surface and its natural exfoliation. The cell cycle is an important characteristic of skin health and youth.

Ingredients: purified water, glycolic acid.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 50% pH 2.0 Gel

The course of glycolic peels leads to a decrease in the thickness of the cornea, i.e. non-viable layer of the epidermis and thickening of the living dermis, where all the processes to maintain youth and beauty of the skin. This gives a good chemical polishing of the skin surface (smoothing of wrinkles, softening of post-acne scars), as well as excellent tone and hydration. Skin is renewed, filled with collagen and hyaluronic acid.

Ingredients: purified water, glycolic acid partially neutralized 50%.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling G50 pH 1.2 (gel)

An acid removes the ballast of outdated skin cells from its surface.

Ingredients: purified water, glycolic acid 30%, citric acid 5%, lactic acid 5%, tartaric acid 5%, malic acid 5%.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Glycolic peeling 70% pH 0.79

It perfectly helps against sun spots on the body, reduces wrinkles, and evens scars, recommended for people with more damaged skin.

Ingredients: purified water, glycolic acid 40%, citric acid 8%, lactic acid 8%, tartaric acid 6%, malic acid 8%.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Salicylic-Glycolic peeling pH 2.0 (gel)

It reduces inflammation, dissolves open comedones, eliminates hyperkeratosis, brightens post acne spots, and tightens pores. Deeper penetration into the skin allows you to even out the skin relief, remove wrinkles, eliminate scars from acne.

Ingredients: salicylic acid, glycolic acid, citric acid, ethyl alcohol, purified water.

Consumption for 1 procedure: 3 ml.

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

Peeling Gessner classic (gel) pH 2.0

It controls excess sebum, removes comedones, dark spots and scars, smoothes fine lines, and smoothes skin texture and complexion.

Ingredients: resorcinol, salicylic acid, lactic acid, ethyl alcohol.

Consumption for 1 procedure: 3 ml.

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

Peeling Gessner extra pH 1.8

Jessner's peeling is characterized by a more pronounced peeling of skin cells, compared to other peels. So, 4-5 days after the procedure, the skin of the face begins to crawl strongly, there is a feeling that one layer of skin is removed. That is how he acts. And in a week you will get a completely new, smooth and clean skin.

Ingredients: resorcinol, salicylic acid, lactic acid, alcohol.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Peeling Gessner 7+ (gel) pH 2.36

An important feature of this peeling is that, in addition to removing the cornified layer of the epidermis to a certain depth, it promotes the active regeneration of skin cells.

Ingredients: resorcinol, salicylic acid, lactic acid, alcohol.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

Resorcinol peeling pH 2.5 (gel)

Resorcinol has disinfecting properties perfectly fights bacteria and eliminates dead skin cells. The action of lactic acid is aimed at softening and moisturizing the skin, stimulating collagen synthesis.

Ingredients: purified water, resorcinol, lactic acid, citric acid, salicylic acid, ethyl alcohol.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

akademiya-krasoty-nikol.prom.ua

Retinol peeling pH 3.26 (gel)

Retinol acid provokes an additional production of natural collagen and elastin, restores the normal balance of the skin, and provokes the synthesis of fats that is necessary for the normal functioning of the protective layers of the skin.

Ingredients: purified water, retinol, resorcinol, ethyl alcohol.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

akademiya-krasoty-nikol.prom.ua

Retinol-glycolic peeling pH 2.5

Has the ability to reduce hyperpigmentation and stimulates cell regeneration.

Ingredients: purified water, retinol, glycolic acid, and ethanol.

Consumption for 1 procedure: 3 ml

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

Anti-inflammatory peeling "Intensive" pH 1.5

Anti-inflammatory facial peeling has a complex action and instantly transforms the skin, has a healing effect. In the presence of comedones helps cleanse and reduce pores, thereby reducing the rash. In inflammatory forms of acne reduces inflammation, brightens stagnant and pigment spots. In case of post-acne, reduces the severity of scars, evens out the skin texture visibly corrects fine wrinkles, renews the skin, giving it smoothness and radiance.

Ingredients: glycolic acid 7%, lactic acid 5%, citric acid 3.4%, kojic acid 3.2%, phytic acid 3%, tartaric acid 3%, acetyl hexapeptide-8 2%, ascorbyl sodium phosphate 2%.

Indications:

- increased activity of the sebaceous glands, a tendency to rashes;
- enlarged, clogged pores;
- dryness and irritability of the skin;
- dull complexion, uneven relief of the epidermis;
- spots left over from acne;
- first wrinkles, skin wilting, dehydration.

Contraindications:

- inflammation of the skin or its infectious lesion in the active stage, herpes;
- the presence of allergies or individual intolerance to the components of the chemical composition, asthma;
- period of pregnancy and lactation;
- reception of systemic retinoids (peeling is possible only after 6 months);
- violation of the integrity of the skin;
- severe acne (papulopustular);
- atopic dermatitis;
- demodex (acute stage);
- chronic urticaria;
- couperosis;
- multiple warts, moles, nevi;
- skin is atrophic, thinned;
- oncology, chemotherapy.

Consumption for 1 procedure: 3 ml.

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

Peeling “Anti-acne” pH 3.4

Multi-peeling Anti-acne has a complex effect on the skin. The synergy of the AHA and BHA acids, which is part of the peeling, it has a powerful anti-inflammatory, antiseptic and regenerating effect. Due to the minimal irritating and pronounced therapeutic effect, it is recommended to use for skin with signs of acne, incl. sensitive skin.

Ingredients: azelaic acid 12%, lactic acid 7%, citric acid 5%, salicylic acid 4%, tartaric acid 4%.

Indications:

- seborrheic dermatitis;
- acne 1-2 severity;
- oily skin;
- post acne scars;
- folliculitis;
- excessive skin pigmentation;
- elimination of the consequences after the treatment of acne;
- photoprotective product

Consumption for 1 procedure: 3 ml.

Release form: 10 ml, 25 ml, 50 ml, 100 ml.

Peeling Anti-age pH 3.5

Anti-age multi-acid peeling is a unique combination of acids and peptide complex, which in synergy initiate the cell's own potential, triggering the processes of cell renewal - cellular metabolism is activated, fibroblast activity increases, synthesis of collagen and glycosaminoglycans is normalized. Having a powerful biological activity, peeling, also has a powerful tonic effect, helps to smooth the skin and reduce the depth of wrinkles, improves skin elasticity, refreshes and evens the complexion.

Ingredients: Glycolic acid 7%, Lactic acid 5%, Citric acid 3.4%, Kojic acid 3.2%, Phytic acid 3%, Tartaric acid 3%, Acetyl Hexapeptide-8 2%, Ascorbyl sodium phosphate 2%.

Indications:

- effects of chrono- and photoaging;
- prevention of age-related changes;
- the presence of enlarged pores;
- pigmentation of some types;
- hyperkeratosis;
- post-acne congestion;
- fading skin;
- young atonic skin;

Contraindications:

- individual intolerance;
- the presence of skin lesions in the intended areas of treatment;
- inflammation of the skin;
- couperosis;
- bronchial asthma;
- strongly tanned skin;
- oncology;
- active phase of herpes;
- pregnancy and lactation period;
- diabetes;
- medication with isotretinoin, retinoids for six months before the peeling procedure;
- period of high solar activity.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml, 100 ml.

TCA 15% Light pH 0.7

One of the varieties of median chemical peeling is TCA peeling. The peculiarity of the procedure is that trichloroacetic acid used in the peeling process has a bactericidal and anti-inflammatory effect.

Ingredients: trichloroacetic acid, glycerin, purified water.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml.

akademiya-krasoty-nikol.prom.ua

TCA 25% Light pH 0.19

The procedure is really effective and allows you to cope with many age-related skin changes. After peeling wrinkles are not so noticeable. Scars, stretch marks and scars are also not so clearly reminded of their presence. TCA helps peeling and in the presence of residual effects after acne. To achieve the maximum effect, doctors recommend a full course of three to five procedures (between which there is an interval of up to four weeks).

Ingredients: trichloroacetic acid, glycerin, purified water.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml.

TCA 35% Light pH 0.07

Trichloroacetic acid, being organic, is highly soluble in water and has cauterizing and cleansing properties (the acidic environment perfectly cleans the surface layer of the epidermis, making the skin smooth and clean).

Ingredients: trichloroacetic acid, glycerin, purified water.

Consumption for 1 procedure: 1 ml

Release form: bottle of 10 ml.

akademiya-krasoty-nikol.prom.ua

TCA 10% Classic pH 0.34

The mechanism of the procedure includes coagulation of the protein structures of the skin, removal of the cornified layer and damaged by pigmentation, wrinkles, acne of cells of medium depth, activation of cell division of the basal layer.

Ingredients: trichloroacetic acid, purified water

Consumption for 1 procedure: 1 ml

Release form: bottle of 10 ml.

akademiya-krasoty-nikol.prom.ua

TCA 15% Classic pH 0.34

Trichloroacetic peeling has the following effects: lifting; loosening; antioxidant; whitening; antiseptic.

Ingredients: trichloroacetic acid, purified water.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml.

TCA 25% Classic pH 0.19

Peeling will help to cope with the following problems: the effects of acne (scars, pits, and deep traces); seborrhea; skin pigmentation; increased lipid secretion; wrinkle grids; epidermal melasma; stretch marks; reduced elasticity of the skin; enlarged pores.

Ingredients: trichloroacetic acid, purified water.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml.

akademiya-krasoty-nikol.prom.ua

TCA 35% Classic pH 0.07

Under its influence the skin gets a severe burn. This causes the activation of metabolic processes and cell division. Skin recovered after injury looks younger. Capillary dilation occurs to provide increased skin needs for nutrients and oxygen. And to remove a large amount of toxic metabolic products and fragments of dead tissues lymphatic drainage is enhanced.

Ingredients: trichloroacetic acid, purified water

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml.

akademiya-krasoty-nikol.prom.ua

Biotonic "Neutralizing"

It consists of herbal extracts that have the effect of delicate moisturizing, soothe sensitive and irritated skin. The coltsfoot extract contains tannins, inulin, ascorbic acid, vitamins, etc.

Ingredients: purified water, glycerin, mother-and-stepmother leaf birch leaves, arnica flowers, cucumber.

Consumption for 1 procedure: 6 ml

Product form: bottle with dispenser 100 ml, 250 ml.

Biotonic neutralizing “Extra”

It is used to neutralize the action of chemical peeling. Due to its natural extracts of chamomile, aloe vera, green tea has a moisturizing effect on the skin, soothes the skin and reduces irritation caused by chemical peeling. Skin becomes fresh, microcirculation improves.

Ingredients: purified water, chamomile extract, aloe extract, panthenol, allantoin, sodium bicarbonate, green tea extract.

Consumption for 1 procedure: 6 ml.

Release form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Neutralizing Moisturizing Toner

It is used to neutralize the action of chemical peeling. Thanks to the natural substances it contains, it has a moisturizing effect on the skin, soothes the skin and reduces the irritation caused by chemical peeling. After use, the skin becomes fresh and updated, improves microcirculation.

Ingredients: purified glycerin water, hydrolyzed almond proteins, milk protein hydrolyzate, collagen, pine buds, plantain leaves, silk protein hydrolyzate, menthol, D-panthenol, allantoin, hyaluronic acid 0.5%.

Consumption for 1 procedure: 6 ml.

Product form: 100 ml dispenser bottle.

Gels

- Antiseptic cooling gel after peeling with mint hydrolate
- Gel for radiolifting and phonophoresis
- Gel for MCT (microcurrent therapy)
- Alginate gel with collagen
- Aloe vera concentrate (gel)
- Atraumatic cleansing gel "Cold hydrogenation"

Antiseptic cooling gel after peeling with mint hydrolate

It promotes rapid healing of injured skin and recommended to protect the skin after dermo-cosmetic procedures.

Ingredients: mint hydrolate, chamomile hydrolate, D-panthenol, tea tree essential oil.

Indications: recommended for skin protection after dermo-cosmetic procedures for all skin types.

Scope: professional care.

Method of application: apply to the skin after all procedures.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 50 ml, 100 ml.

Gel for radiolifting and phonophoresis

The gel ensures good contact between skin and electrodes during radiolifting, phonophoresis, and myostimulation. The soft formula eliminates skin dehydration.

Ingredients: centifolia marinda extract, vegetable proteins of peas and rice, glycerin, gelling agent.

Indications: for all skin types.

Scope: radio lifting, phonophoresis, myostimulation.

Consumption for 1 procedure: 5 ml.

Product form: 10 ml, 30 ml, 50 ml, 100 ml dispenser bottle.

Gel for microcurrent therapy

The gel is used as a guide gel for microcurrent therapy procedure.

Ingredients: centifolia marinda extract, vegetable proteins of peas and rice, glycerin, gelling agent, noni fruit juice.

Indications: for all skin types.

Scope: microcurrent therapy.

Consumption for 1 procedure: 5 ml.

Product form: 10 ml, 30 ml, 50 ml, 100 ml dispenser bottle.

Alginate gel with collagen

Collagen, which is a part of the gel, makes the skin supple and elastic, smoothes wrinkles and restores turgor. It has exceptional moisturizing properties. Increased cell hydration contributes to tissue restructuring, rejuvenating the skin.

Ingredients: glycerin, purified water, 5% collagen solution, sodium alginate.

Indications: for all skin types, especially dry, dehydrated.

Scope: professional and home care.

Mode of application:

- when carrying out care procedures: use as a final remedy after the procedure.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. Apply 1-2 times a day. It is an excellent base for makeup.

Consumption for 1 procedure: 5 ml.

Release form: bottle with dispenser 10 ml, 30 ml, 50 ml, 100 ml

Aloe Vera concentrate (gel)

It is an effective product that enhances the protective function of the skin. Biologically active substances and a complex of the most important vitamins contained in it stimulate metabolic processes and promote cell renewal. The gel has a soft but effective effect on the skin, does not give negative side effects. It has a pleasant cooling effect.

Ingredients: ethyl alcohol, purified water, aloe vera leaf

Indications: problem skin, acne, pustular acne, as well as for all skin types according to indications.

Scope: professional and home care.

Mode of application:

- for professional care: after traumatic cleansing, apply gel pointwise on the sites of opened pustules and comedones, let it soak. Then apply care and protection.
- for home care: apply a few drops of gel on cleansed and toned skin of the face locally on areas with redness and /or irritation. Leave until completely absorbed. Then apply care and protection. Apply 2-3 times a day.

Consumption for 1 procedure: 1 ml.

Product form: 10 ml, 30 ml, 50 ml, 100 ml dispenser bottle

Atraumatic cleansing gel "Cold hydrogenation"

Gel "Cold Hydrogenation" allows you to prepare the skin for the procedure of atraumatic cleansing, expands the pores, and loosens the epidermis. It allows you to weaken the intercellular bonds for better removal of pollution, as well as to make a passive peeling. The skin is cleared of old dry keratin cells and decay products, which are easily removed from the skin with a wet cloth.

Ingredients: urea, hyalouran acid, camphor, panthenol, lactic acid, fresh-water sponge extract.

Indications: for all skin types

Scope: mechanical cleaning. It is possible to use the gel before ultrasonic cleaning.

Mode of application:

After cleansing / removing makeup, apply the gel with a brush on the face with a thick layer, cover with plastic wrap and leave for 20 minutes. You can re-apply the gel on problem areas. For the best effect and shorten the exposure time, cover your face with a wet hot towel. Compress leave for 10-15 minutes, after which you can start cleaning, removing the film only from the treated area of the face.

ATTENTION! WORK AROUND EYES WITH GEL IS PROHIBITED!

Consumption for 1 procedure: 10 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Anti-aging serum with retinol 0.3% under eyes

Serum for night use with vitamin A contains 0.3% retinol, which helps to stimulate the synthesis of collagen, tightens the skin, increases the content of hyaluronic acid, and improves the appearance and texture of the skin. Serum has a pronounced regenerating effect, reduces the depth wrinkles around the eyes, and has a tonic and brightening effect.

Ingredients: wheat germ oil, almond oil, sunflower oil, avocado oil, CO2 extract of coconut, retinol - 0.3%, vitamin E 0.1%, orange essential oil.

Night serum with vitamin A contains 0.3% retinol, which helps stimulate the synthesis of collagen, tightens the skin, increases the content of hyaluronic acid, and improves the appearance and texture of the skin.

Serum has a pronounced regenerating effect, reduces the depth wrinkles around the eyes, has a tonic and brightening effect.

Indications:

- systemic anti-aging care for the delicate area around the eyes;
- restoration of the dermal matrix;
- photo aging;
- the presence of dark circles under the eyes.

Contraindications:

- pregnancy, lactation;
- passing an acne course with the use of pharmaceuticals and other cosmetic brands;
- liver and kidney disease.

Attention! The drug is used only under the supervision of a cosmetologist, according to the instructions for use.

Consumption for 1 procedure: 1 ml.

Product form: 10 ml, 25 ml, 50 ml dispenser bottle.

Anti-Aging Serum with Retinol 0.6% for face

Intensive night serum with vitamin A contains 0.6% retinol. Serum reduces the signs of aging, hyperpigmentation and hyperkeratosis, brightens the skin. Eliminates the manifestation of acne, has a seboregulatory effect. Improves skin texture, has a tonic effect.

Ingredients: wheat germ oil, almond oil, sunflower oil, avocado oil, CO2 extract of coconut, retinol - 0.6%, vitamin E 0.1%, orange essential oil. Intensive night serum with vitamin A contains 0.6% retinol. Serum reduces the signs of aging, hyperpigmentation and hyperkeratosis, brightens the skin. Eliminates the manifestation of acne, has a seboregulatory effect. Improves skin texture, has a tonic effect.

Indications:

- system mode of anti-aging care;
- care for aged skin;
- restoration of the dermal matrix;
- acne skin care;
- photo aging;
- preparation for peeling procedures, a course of preparation for a retinol care program.

Contraindications:

- pregnancy, lactation;
- passing an acne course with the use of pharmaceuticals and other cosmetic brands;
- liver and kidney disease.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Rejuvenating biorevitalizant with a complex of omega-3,6,9 acids

Ingredients: omega-3, omega-6, omega-9 acid, tea rosemary hydrol, goji berry extract, cornflower extract, daisy extract, milk protein hydrolyzate, supercritical extract of CO 2 coconut.

Biocomplex is a rich source of oleic, linoleic and linolenic acids obtained by the method of double distillation from vegetable raw materials, flavonoids, natural phytoestrogens, as well as trace elements and mineral salts.

The hydrolyzed milk proteins and the supercritical coconut extract provide the skin with the necessary hydration, and the Goji berry extract and daisies provide the necessary level of lifting effect. Rose hydrolate gives the skin elasticity and dullness, reduces facial wrinkles and puffiness.

It eliminates dryness, peeling and skin irritation. Softens and improves skin elasticity, making it soft, smooth, velvety. It restores the water-lipid balance. The complex has excellent moisturizing and nourishing properties, promotes the synthesis of collagen and elastin, is involved in skin metabolism. Due to the presence of trace elements concentrate perfectly nourishes the skin. Estrogen-like substances of plants stimulate the metabolism in the skin and contribute to the restoration of the natural moisturizing factor of the skin.

The product increases skin elasticity, tones and moisturizes it, eliminating fine wrinkles.

Indications: prevention and correction of age-related changes for all skin types.

Scope: professional and home care.

Mode of application:

- during the treatment procedures: use as a final cosmetic after the procedure, including the area around the eyes. If necessary, apply a cream with a layer of 2nd.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. It is possible to use as an independent cosmetic product, as well as for day care / night cream or makeup, including the area around the eyes. Apply 1-2 times a day (morning / evening) as a basic care.

Consumption for 1 procedure: 1 ml.

Release form: 10 ml, 25 ml, 50 ml.

Emulsion to relieve inflammation and prevent scarring of the skin.

NEW !!!

The emulsion has an antibacterial and pronounced wound-healing effect. It is effective in combating redness and inflammation. Restores the natural balance of the microflora of the skin, stimulates the synthesis of young cells, and regulates the release of sebum. It has a pronounced soothing, regenerating effect. It is an excellent product for completing chemical peeling, microdermabrasion, laser photorejuvenation and other traumatic procedures, as well as for the purpose of rehabilitation care.

Ingredients: purified water, omega-3, omega-6, omega-9 acid, supercritical CO₂ green tea extract, willow-herb extract, fireweed extract, willow bark extract, dandelion root extract, glycyrrhizic acid, tea tree essential oil.

Indications: the presence of irritation, inflammation, acne, prevention and treatment of post-acne, care after aggressive procedures.

Scope: professional and home care.

Mode of application:

- during the treatment procedures: use as a final cosmetic after the procedure, including the area around the eyes. If necessary, apply a cream with a layer of 2nd.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. It is possible to use as an independent cosmetic product, as well as for day/night care cream or makeup, including the area around the eyes. Apply 2 times a day as a basic care.

Consumption for 1 procedure: 1 ml.

Release form: 10 ml, 25 ml, 50 ml.

Anti-inflammatory concentrate-intense

Anti-inflammatory concentrate is ideal in the fight against acne, various rashes and irritations. The action of the complex is based on its ability to deeply cleanse the skin, prone to acne, moisturize it and strengthen the natural immunity. As a result, the activity of pathogenic bacteria is reduced, and inflammation is reduced. Improving skin's own immunity helps prevent the recurrence of acne and irritation.

Ingredients: purified water, glycerin, morinda fruits, comfrey root, rice protein hydrolyzate, sage leaves, ivy leaves, silkworm cocoon hydrolyzate, and sunflower flowers.

Indications: problem skin, acne prevention, as well as for all skin types according to indications.

Scope: professional and home care.

Mode of application:

as an active concentrate under the alginate masks: apply the concentrate with a brush on the face with a thin layer, apply a mask on top of your diagnosis.

- for home care: after cleansing, apply the concentrate on a previously prepared skin with a thin layer and let it soak. Then apply care and protection. Apply 1-2 times a day.

Consumption for 1 procedure: 2 ml.

Release form: bottle of 10 ml, 30 ml, 50 ml, 100 ml.

Serum “Anti-couperosis”

It is a firming serum designed for the face, which reduces inflammation and redness, combats the manifestation of rosacea, softens and soothes, has a strengthening effect on the vessels.

Ingredients: purified water, glycerin, Sophora fruits, grass Hypericum, elderberry flowers, and cumin seed sandy.

Indications: for all skin types in order to reduce the manifestations and prevention of rosacea.

Scope: professional and home care.

Mode of application:

- as an active concentrate under alginate masks: apply a thin layer of serum with a brush on the face with a thin layer, top apply a mask according to your diagnosis.
- for home care: after cleansing, apply the serum on a previously prepared skin with a thin layer and let it soak. Then apply care and protection. Apply 2 times a day.

Consumption for 1 procedure: 2 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Serum "Instant Lifting"

Due to the high concentration of active ingredients, it acts instantly. It tightens and smooths the skin by stimulating the natural synthesis of collagen and elastin fibers of the skin and restoring their structure. Also, its composition allows strengthening the intercellular substance. In addition, when using serum, skin cells receive maximum moisture and nutrition, which leads to an increase in its tone, elasticity and smoothing of mimic wrinkles.

Ingredients: purified water, glycerin, hydrolyzed bean proteins, hydrolyzed green pea proteins, hydrolyzed rice peptide proteins.

Indications: decrease in elasticity, tone, dehydration, and also for all skin types according to indications.

Scope: professional and home care.

Mode of application:

- as an active concentrate under alginate (including plasticizing) masks: apply a serum with a brush on the face with a thin layer, apply a mask on top of your diagnosis.
- for home care: after cleansing, apply the serum on a previously prepared skin with a thin layer and let it soak. Then apply care and protection. Apply 2 times a day.

Consumption for 1 procedure: 2 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Serum "Complex regulation of sebum secretion"

It regulates the sebaceous glands. It has an anti-inflammatory, moisturizing, soothing effect, eliminates redness, itching, irritation.

Ingredients: purified water, glycerin, green tea leaf, licorice root, sulfates.

Indications: oily skin, treatment and prevention of acne, enlarged pores.

It can be used to care for problem skin of teenagers.

Scope: ultrasound therapy, microcurrent therapy, professional and home care.

Mode of application:

- with ultrasound therapy: apply a thin layer on cleansed skin and, tightly pressing the handpiece to the skin, follow the procedure with a sliding motion (3-5 minutes). Wash off with water. Apply a mask (cream) for your diagnosis.

Product form: 15 ml, 25 ml, 50 ml, 100 ml dispenser bottle.

Anti-age serum with retinol 2% **NEW !!!**

Anti-aging serum is highly effective with a high content of retinol for the correction of age-related skin changes and intensive rejuvenation. The use of serum gives noticeable results in anti-aging care, it controls pigmentation and helps in the treatment of acne.

Ingredients: octyldodecanol, wheat germ oil, cetearyl glucoside cetylstearyl alcohol, mango seed oil, apricot kernel oil, grape leaves oil, vitamin C, D-panthenol, retinol, capril / capric triglyceride, caffeine, allantoin, benzol alcohol, benitol, benzyl alcohol, benzyl alcohol, benzyl alcohol, benzyl alcohol, benzyl alcohol, caffeine, allantoin, benzol alcohol .

Indications:

- system mode of anti-aging care;
- care for aged skin;
- restoration of the dermal matrix;
- acne skin care;
- pigmentation;
- photo aging;
- improvement of hair and scalp.

Attention! The drug is used only under the supervision of a cosmetologist, according to the instructions for use.

Consumption for 1 procedure: 1 ml

Release form: 10 ml, 25 ml, 50 ml.

Sterile serums for mesotherapy

- “Instant Lifting” mesoserum **NEW!!!**
- “Face and body” mesoserum lipolytic

“Instant Lifting” mesoserum

Actions:pronounced lifting; skin rejuvenation, reducing the depth and number of wrinkles; intense and deep hydration; steady revitalizing effect.

Ingredients: water, panthenol, sodium hyaluronate, trehalose, urea, soluble collagen, dimethylaminoethanol, lauroyl lysine, serine, pentylene glycol, algin, caprylyl glycol, pullulan, sodium chloride.

Indications:

- dehydrated and dry skin;
- “aged” skin with a pronounced network of fine wrinkles;
- sluggish and atonic skin of the face and neck, age-related changes in the décolleté area;
- prevention of early signs of aging;
- prevention and elimination of the effects of photoaging;
- intensive anti-age therapy.

General contraindications:

- fear of injections;
- mental illness;
- individual intolerance to the components of the drug;
- pregnancy and lactation;
- infectious skin diseases;
- benign and malignant neoplasms of various localization;
- pathological tendency to the appearance of keloid scars;
- bleeding disorders.

Local contraindications:

- infectious inflammatory processes in the place of the procedure;
- recurrent herpes;
- peels (laser peeling, performed less than 1 month ago, median chemical peeling, performed less than 2 weeks ago).

Before carrying out mesotherapy should wait for the full recovery of the skin.

Consumption for 1 procedure: 1.5-2 ml.

Release form: bottle of 5 ml.

“Face and body” mesoserum lipolytic

It corrects double chin and is used in anti-cellulite programs. It has lipolytic indirect action. Course – 6-10 procedures. The procedure is carried out 1 time in 10 days. Lymphatic drainage massage is recommended for 4 days after the procedure. The drug is injected hypodermal, injection depth 12-14mm.

Ingredients: L-carnitine, caffeine, Centella Asiatic, artichoke, and prickly needle.

Consumption for 1 procedure: 2.5 ml-chin and 5 ml-body.

Release form: 5 ml.

Sterile serums for mesorollers and dermastamps

- Sterile hyaluronic acid 1.5%
- Sterile extra-moisturizing serum with hyaluronic acid 0.5% with fucogel
- Sterile anti-couperosis serum

Sterile hyaluronic acid 1.5%

Hyaluronic acid is often used in mesotherapy. Hyaluronic acid stimulates metabolic processes in the cells and intercellular space of the skin, which contributes to the formation of new blood vessels in the area of treatment with a mezoroller/dermashtamp. It is really an effective remedy for the treatment of age-related changes, inflammatory processes and various scars on the skin. Mesoscaler mesotherapy with the use of hyaluronic acid should be carried out regularly, as it is quickly incorporated into the metabolic processes and completely absorbed.

Ingredients: contains a combination of low molecular weight hyaluronic acid to 50 kDa, weight average to 70 kDa, cross-linked hyaluronic acid, and purified water.

Indications: for all skin types according to indications.

Scope: professional care.

Method of application: can be used under mezoroller, dermashtamp.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 7 ml.

Sterile extra-moisturizing serum with hyaluronic acid 0.5% and fucogel

It nourishes the skin with moisture, helps it restore its natural mechanisms of moisture retention. Instantly smoothes out fine wrinkles resulting from dehydration of the skin. It interferes with loss of elasticity of skin, restoring its healthy and natural color.

Ingredients: biosaccharide (fucogel) 5%, sodium hyaluronate 0.5%

Indications: for all skin types according to indications.

Scope: professional care.

Method of application: can be used under the mezoroller, dermashtamp.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 7 ml.

Sterile anticouperosis serum

Product, created specifically for the treatment of problem skin. It gives a quick visible effect. The formula is saturated with active ingredients with a moisturizing, anti-inflammatory, soothing effect. The product is intended for intensive treatment of problems associated with vessels, such as redness, stagnant spots, vascular "mesh".

Indications: for all skin types in order to reduce the manifestations and prevention of rosacea.

Ingredients: water, hop extract, horse chestnut extract, chamomile extract, hyaluronic acid, rutin, troxerutin.

Scope: professional care.

Method of application: can be used under mezoroller, dermashtamp.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 5 ml.

Beauty series with hyaluronic acid

- Hyaluronic acid
- Hyaluronic acid with a peptide complex
- Extramoisturizing serum with hyaluronic acid 1.5%
- Extramoisturizing serum with hyaluronic acid 0.7% and fucogel
- Drops with hyaluronic acid and vitamin C
- Hyaluronic acid with collagen
- Hyaluronic acid with elastin
- Hyaluronic acid with fruit acids and vitamin C
- Hyaluronic acid with a complex of plant phytoestrogens
- Instant lifting with hyaluronic acid
- Hyaluronic acid with “Anti-Age” complex

Hyaluronic acid

Hyaluronic acid is considered to be the keeper of beauty and youth. It retains natural moisture, has an anti-inflammatory effect, rejuvenates skin cells, tones, and smoothes and refreshes the complexion, has a calming and refreshing effect.

Ingredients: purified water, hyaluronic acid 2%

Indications: age-related skin changes, deep wrinkles, dehydrated skin, impaired hydrolipid mantle and skin tone, as well as for all skin types according to indications.

Scope: ultrasound therapy, microcurrent therapy, iontophoresis, RF-therapy, electroplating, professional and home care.

- for microcurrent therapy: when using metal tips, apply to the skin, when using gloves or cotton swabs, moisten them and perform the procedure (15-20 min).
- during iontophoresis: enter within 10 min from the negative pole, and then 2-3 minutes from the positive.
- in case of RF-therapy: apply on the skin with a dense layer and work as a manipulator according to the protocol of the method.
- in case of electro-cleaning: carry out the procedure according to the instructions to the device.
- as an active concentrate under alginate (including plasticizing) masks: apply a thin layer on cleansed skin and inject it with light massage movements until fully absorbed, top apply a mask according to your diagnosis.
- for home care: apply a thin layer on cleansed skin and inject with light massage movements until completely absorbed. After 5-10 minutes, remove the excess tonic. Then apply care and protection. Apply 1-2 times a day.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Hyaluronic acid with peptide complex

The effectiveness of this complex is associated with the ability to suppress the synthesis of the main protein of aging - progerin, so that the aging process slows down at the cellular level.

Ingredients: purified water, glycerin, pentopeptide, hexapeptide, hyaluronic acid 1% low molecular weight.

Indications: age-related skin changes, especially dry, dehydrated, as well as for all skin types according to indications.

Scope: ultrasound, microcurrent therapy, iontophoresis, electroplating, professional and home care.

Mode of application:

- with ultrasound therapy: apply a thin layer on cleansed skin and, tightly pressing the handpiece to the skin, follow the procedure in a sliding motion (10-15 minutes).
- for microcurrent therapy: when using metal tips, apply to the skin, when using gloves or cotton swabs, moisten them and perform the procedure (15-20 min).
- during iontophoresis: enter within 10 min from the negative pole, then 2-3 minutes from the positive.
- in case of electro-cleaning: carry out the procedure according to the instructions to the device.
- as an active concentrate under alginate (including plasticizing) masks: apply a thin layer on cleansed skin and inject it with light massage movements until fully absorbed, top with a mask according to your diagnosis.
- for home care: apply a thin layer on cleansed skin and inject with light massage movements until completely absorbed. After 5-10 minutes, remove the excess tonic. Then apply care and protection. Apply 1-2 times a day.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Extramoisturizing serum with hyaluronic acid of 1,5%

The serum contains a phytocomplex capable of binding and retaining moisture in the skin for a long time. It is a natural regulator of the level of skin hydration. In addition, serum is an excellent antioxidant that neutralizes free radicals, protects against the adverse effects of the environment and nourishes the skin. It restores its own protective functions.

Ingredients: panthenol, kelp extract, green pea protein hydrolyzate, haricot protein hydrolyzate, rice proteins, methyl chloroisothiazolinone / methylisothiazolinone, sodium hyaluronate 1.5%.

Indications: dehydrated skin, a violation of the lipid mantle, reduced skin tone and elasticity, as well as for all skin types according to indications.

Scope: ultrasound therapy, microcurrent therapy, professional and home care.

- with ultrasound therapy: apply a thin layer on cleansed skin and, tightly pressing the handpiece to the skin, follow the procedure in a sliding motion (10-15 minutes).
- for microcurrent therapy: when using metal tips, apply to the skin, when using gloves or cotton swabs, moisten them and perform the procedure (15-20 min).
- as an active concentrate under alginate (including plasticizing) masks: apply a thin layer on cleansed skin and inject it with light massage movements until fully absorbed, top apply a mask according to your diagnosis.
- for home care: apply a small amount of serum on your face with light tapping movements daily in the morning and evening until completely absorbed. Then apply care and protection.

Consumption for 1 procedure: 1 ml.

Release form: bottle of 10 ml, 25 ml, 50 ml.

Extramoisturizing serum with hyaluronic acid 0.7% with fucogel

Serum provides moisturizing to the skin with double lasting effect - moisturizes the skin from the inside and outside. It makes skin silky and delicate, gives a feeling of comfort, protects against aggressive environmental influences, and restores skin after peels and aggressive effects.

Ingredients: fucogel, sodium hyaluronate 0.7%, green pea protein hydrolyzate, bean protein hydrolyzate, rice proteins, methyl chlorisothiazolinone.

Indications: dehydrated skin, a violation of the lipid mantle, reduced skin tone and elasticity, as well as for all skin types according to indications.

Scope: ultrasound therapy, microcurrent therapy, professional and home care.

Universal moisturizing cream for men

It has a lightweight texture, has a light texture and excellent absorption rate. The exclusivity of the product is provided by its patented hyalurosmooth complex, which is a universal active ingredient in the care of men's skin - it intensively moisturizes, improves skin tone, and retains moisture. Allantoin is the part of the cream perfectly protects and soothes the skin. It is good for all types of men's skin for daily use as a night and daily cream.

Indications: the agent is recommended to be used for all types of skin of men 2 times a day for day care, as well as after shaving.

Ingredients: purified water, olive oil, Shea butter (shea), macadamia oil, ammonium acryldimethyl taurate / copolymer, allantoin, patented hyalurosmooth complex, panthenol, vitamin E, organic preservatives, perfume composition "Man".

Consumption for 1 procedure: 3 ml.

Release form: 30 ml, 60 ml, 100 ml, 250 ml.

Extra moisturizing cream with fucogel SPF 15

Extra moisturizing cream is aimed at restoring skin tone and elasticity, saturating it with moisture, smoothing small facial wrinkles and reducing deep ones. It provides a tightening of the facial contours and activation of the production of its own collagen. It is an excellent softening cosmetic that promotes nutrition and restoration of damaged skin. The SPF 15 sun protection factor will help the dermis to be more resistant to sunlight.

Indications: dehydrated skin, reduced tone, elasticity and hydration of the skin, as well as for all skin types as a basic daily moisturizer.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure.
- for home care: use as a care product. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Moisturizing eye cream-fluid

Cream-gel provides a lifting effect for tired eyes. It perfectly tones the skin, reduces puffiness and swelling, making dark circles under the eyes less noticeable. Moisturizes and protects delicate skin around the eyes, smoothes fine lines.

Ingredients: purified water, grape seed oil, cetear-12, cetear-20, cetearyl alcohol, cetyl palmitate, glyceryl stearate, almond oil, mulberry extract, glycerin, d-panthenol, wheat germ oil ivy extract, ascorbic acid, alpha glucosylhexin sodium, hydrogenated polydecene, tridecet-6, tocopherol acetate, acetyl tetrapeptide - 5, octyl palmitate, rutin, triglycerides linoleic, linolenic and arachidonic acids, BTB perfume composition, benzyl alcohol, methyl chloroisotriazoline, methyisotriazolinone.

Indications: puffiness, dark circles around the eyes, "bags" under the eyes, age spots in the lower eyelid, as well as for all skin types as a basic tonic and moisturizer for the skin around the eyes.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream for the skin around the eyes. If necessary, use serum as indicated before application.
- for home care: apply a small amount of cream on the skin around the eyes with light movements until completely absorbed. Use cream 1-2 times a day (morning and evening).

Consumption for 1 procedure: 0.5 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Daily cream with lifting effect

It gives the skin elasticity, protects against the first signs of aging. The complexion gets delightful freshness, and the skin becomes smooth, supple and matte. The cream visually “tightens” the skin and nourishes it with moisture, fills it with energy and vitality, stimulates collagen production, keeps the skin young and fresh. The cream contains a UV filter that neutralizes the negative effects of ultraviolet radiation, protecting skin that is weakened and prone to redness.

Ingredients: UVA / UVB filter complex, olive oil, coconut oil, camellia extract, silk proteins, DMAE, arnica extract, glycerin, D-panthenol, allantoin, tocopherol acetate, lemongrass essential oil.

Indications: for skin with reduced tone as a basic day care product, as well as for all skin types according to indications.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist. Apply 1 time per day (morning) as a daily basic care product.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Daily cream whitening

The cream, enriched with plant extracts and exclusive whitening agents, is able to whiten the skin evenly and gently, reducing the level of melanin concentration and making freckles and pigment spots less noticeable. Evens complexion and is especially effective if you smoke!

Ingredients: purified water, peach seed oil, shea butter, cetyl octanoate, parsley hydrolate, peccanera extracts, tetylhexyl methoxycinate, dimethicone, phenyltrimethicone, cetearyl alcohol, ceteareth-20, ceteareth-12, cetyl palmitate, cyclopentasiloxylene acetate, distilled cetearyl-20, ceteareth-12; sodium phosphate, kojic acid, D-panthenol, allantoin, tocopherol acetate, dipotassium glycyrrhizinate, perfumery composition, benzyl alcohol, methyl chlorisotriazolinone, methylisotriazolinone.

Indications: for all skin types according to indications.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist. Apply 1 time per day (morning) as a basic day care.

Consumption for 1 procedure: 3 ml.

Product form: bottle with 60 ml, 100 ml, 250 ml dispenser.

Daily cream regenerating

The cream promotes the regeneration of skin cells, healing of cracks and wounds. It restores skin cells with burns, postoperative sutures, wrinkles and premature aging, especially around the eyes and lips. Cream reduces the activity of the formation of keloid wounds and scars. It is an excellent remedy for flabby, fading skin with numerous wrinkles, effective remedy for cracked, irritated, flaky skin.

Ingredients: water, milk thistle oil, wormwood extract, camomile extract, yarrow extract, birch extract, grape seed oil, panthenol, lanolin.

Indications: age-related skin changes, dehydrated skin, violation of the lipid mantle and elasticity for all skin types according to indications. Also recommended for use after traumatic procedures and negative physical factors (cold allergies, sunburn).

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after thorough cleansing and toning, apply evenly on the face and neck. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist. Apply 1 time per day (morning) as a basic day care.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Face&body universal moisturizing cream with hyaluronic acid, fucogel and green tea extract

The cream provides deep, intense moisture from the moment of application and maintains the level of hydration of the skin. Its active ingredients of natural origin effectively moisturize, nourish and restore the protective lipid film. Daily use of the cream helps the skin to more effectively withstand the negative factors of the external environment, gives a feeling of comfort and security.

Ingredients: aloe vera extract, peach seed oil, grape seed oil, wheat germ oil, rosemary extract, fucogel, sage extract, green tea extract, D-panthenol, milk proteins, hyaluronic acid, ammonium copolymer, sorbitol.

Indications: for all skin types as a moisturizer for the face and body.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: for intensive moisturizing and nourishing the skin of the face and body, use 1-2 times a day (morning and evening). If necessary, before applying the cream on the skin of the face, use a serum or concentrate as recommended by your cosmetologist.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml.

Cream "Anti-couperosis"

The cream is designed to care for skin prone to redness and rosacea. Active ingredients strengthen the walls of blood vessels, increase their elasticity. They have a calming, soothing effect; prevent "Spider veins".

Ingredients: purified water, Hamamelis extract, black cumin extract, hop extract, glycerin, chamomile extract, horse chestnut extract, d-panthenol, aloe extract, rutin, walnut oil, caffeine, esculin, rosemary essential oil, tocopherol acetate.

Indications: for the care of dry, very dry and sensitive skin, as well as for all skin types in order to reduce manifestations and prevent rosacea.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after a gentle cleansing and toning evenly apply to the skin. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist.

Apply 2 times a day (morning and evening) as a basic care product.

Attention! When applying the cream on the face, pay special attention to problem areas (wings of the nose, cheeks).

Consumption for 1 procedure: 3 ml.

Product form: bottle with 60 ml, 100 ml, 250 ml dispenser.

Night Elite cream

Night Elite-cream is a highly effective cosmetic for skin care of the face, neck and décolleté. This is a new generation product that transforms the skin. Fills wrinkles, visibly returns the elasticity and density of the epidermis, lost with age. It restores the tone and elasticity of the skin, significantly reducing signs of fatigue - the effect of a “rested face”.

Attention! Due to the unique composition of the composition, the cream is also recommended to use as a basic care product 2 times a day (morning / evening) and the final stage of cosmetic procedures, especially for skin with a reduced ability to regenerate.

Ingredients: purified water, sweet almond oil, isopropyl palmitate, dimethicone, shea butter, collagen hydrolyzate, cetearate-20, ceteareth-12, cetearyl alcohol, cetyl palmitate, glyceryl stearate, peach kernel oil, marula oil, cranberry oil, sea buckthorn oil, rosehip oil, pumpkin oil, DNA of salmon fish, hentamorph algae extract, cognac mannan, retinol palmitate (vitamin A, tocopherol alumina, vitamin , ascorbic acid (vitamin C), sodium hyaluronate, glycerin, caprylyl glycol, sorbic acid, perfumery composition, benzyl alcohol, methyl chloroisotriazolinone, methylisotriazolinone.

Indications: to care for dry, very dry, sensitive and normal skin.

Scope: professional and home care.

Mode of application:

- when carrying out the care procedures: use as a final cream after the care procedure.
- for home care: after cleansing and toning, apply a small amount of cream on the face (neck, decollete). Evenly distribute the massage movements.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Massage cream

The cream will enhance the positive effect of the massage. Its delicate and rich consistency significantly improves the process of gliding along the skin, while the oil-rich formula helps activate the metabolic and regeneration processes in the epidermis, strengthen the tissue fibers and eliminate metabolic products. During the massage, the cream is fully absorbed into the skin, perfectly moisturizing and nourishing it.

Ingredients: purified water, olive oil, Shea butter, peach seed oil, coconut oil, glycerin, sea buckthorn oil, D-panthenol.

Indications: used as a massage product for face, neck, neckline for any skin type.

Scope: professional care.

Method of application: Before massage, apply the cream on the skin in the required amount. It does not require rinsing.

Consumption for 1 procedure: 5 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Cream-gel for problem skin

Light creamy gel is designed for complex correction of oily skin prone to acne. Reduces irritation and redness, protects the skin from dehydration, smoothes the skin surface and gives it a smooth matte tone. Seboregulatory complex of intensive action in combination with plant extracts restores the natural balance of skin microflora, inhibiting the proliferation of bacteria that cause acne, stabilizes the sebaceous glands, reduces the number of inflamed elements, has an astringent effect, narrows pores, reduces the number of black spots. Cream-gel instantly removes the unpleasant feeling of tightness of the skin, restores the mineral balance.

Ingredients: purified water, calendula extract, wormwood extract, plantain extract, geranium extract, oak bark extract, thyme extract, wheat germ oil, glycerin, colloidal sulfur, d-panthenol, and metronidazole.

Indications: oily skin, treatment and prevention of acne and post-acne, enlarged pores. It can be used to care for problem skin of teenagers. It is suitable for the correction of acne on the skin of the chest and back.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after thorough cleansing and toning evenly apply on the skin. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist. Apply 2 times a day (morning and evening) as a basic care product. It is an excellent base for makeup.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Myorelaxing anti-age cream with botox effect

The innovative formula of the cream allows you to work effectively with facial wrinkles. The components of the cream soften and moisturize the skin, give a smoothing effect for a long time, relax the facial muscles, prevent the appearance of deep wrinkles. The cream has a muscle relaxant effect on the muscles of the face, weakening muscle contractions and eliminating the main cause of mimic wrinkles. As a result, mimic wrinkles on the forehead, in the outer corners of the eyes are reduced. Deep wrinkles are softened and new ones are prevented.

Ingredients: Shea butter, grape seed oil, placenta hydrolyzate, elastin hydrolyzate, collagen hydrolyzate, acetylhexapeptide-3, allantoin, sodium hyaluronate, panthenol, retinol palmitate.

Indications: deep and superficial facial wrinkles. It is suitable for all skin types.

Scope: home care.

How to use: after cleansing and toning evenly apply the cream on the forehead and middle part of the skin. Use cream 1 time a day before bedtime.

Attention! Cream with peptides should not be applied in parallel with products with AHA-acids, since these active substances neutralize each other.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Cream soothing after peeling and cleaning with SPF 15

It has a calming and regenerating effect on the skin of any nature. Restores skin structure, has regenerating properties.

Ingredients: chamomile extract, calendula extract, white tea extract, aloe extract, essential oil, sage essential oil, lemon balm essential oil.

Indications: recommended for use after traumatic cosmetic procedures for all skin types.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: evenly apply the cream on the skin. If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist.

Consumption for 1 procedure: 3 ml.

Product form: bottle with 60 ml, 100 ml, 250 ml dispenser.

Sun protective SPF 30 cream

Sun protection cream with a high level of protection SPF 30 reliably protects delicate and sensitive skin from the damaging effects of the sun's rays and prevents premature aging. Its action is extended by a unique complex that provides water-repellent action. Cream gentle texture is easily absorbed, softening and moisturizing the skin.

Ingredients: olive oil, shea butter, grape seed oil, rosemary essential oil.

Indications: for all skin types

Scope: professional and home care.

How to use: Apply a sufficient amount of an even layer on the face, including the area around the eyes, neck and décolleté, in 30 minutes before going out into the sun. To maintain a protective effect, repeat the application every 3 hours, especially when bathing, sweating or using a towel.

Consumption for 1 procedure: 3 ml.

Product form: bottle with 60 ml, 100 ml, 250 ml dispenser.

Moisturizing universal cream for body, hands and feet

The cream has a rich texture, enriched with nutrients, carefully caring for skin substances. It generously moisturizes the skin of the hands and feet, heals cracks, softens the skin, makes smooth and elastic. It heals minor injuries, strengthening the health of the skin. Regular application of the cream provides deep hydration, is quickly absorbed and does not leave a greasy after itself.

Ingredients: urea, European grape extract, olive oil, hibiscus extract, ginkgo biloba extract, passion fruit extract, calendula oil, glycerin, sodium ascorbyl phosphate, sodium hyaluronate, magnesium aspartate, zinc gluconate, copper gluconate, allantoin, d-panthenol.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Cream-fluid "Oil free" SPF 30

This is moisturizing sun protective oil-free face cream with a high level of protection SPF 30. It has a light texture and absorbs very quickly, provides intensive and long-lasting skin hydration, noticeably reduces the shine associated with increased secretion of sebaceous glands, does not clog pores. The skin looks fresh and balanced.

Ingredients: purified water, chamomile extract, caprice / capric triglycerides, ethylhexyl methoxycinnamate, D-pantheons, glycerin, white tea extract, hyaluronic acid.

Indications: for oily, especially oily and combination skin, as well as for all skin types according to indications.

Scope: professional and home care.

How to use: Apply a sufficient amount of an even layer on the face, including the area around the eyes, neck and décolleté, in 30 minutes before going to the sun. To maintain a protective effect, repeat the application every 3 hours, especially when bathing, sweating or using a towel.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Cream-fluid "Oil free" SPF 50

Thanks to the active formula, the product has a light consistency of the emulsion, which absorbs quickly, leaving no white streaks. The formula of the cream contains bioflavonoids of vegetable oils and a complex of sunscreen filters. Provides intensive prolonged moisturizing effect. Helps to strengthen the protective properties of the skin. The cream gives a feeling of comfort, softens, gives the skin a velvety, healthy and well-groomed appearance.

Ingredients: water, glycerin, sweet migdale oil, hydrogenated, sunflower extract, water-soluble avocado oil, dibutyl adipate, diethylaminohydroxybenzoylhexyl benzoate, Polyglycerol-2 Dipolyhydroxystearate, Ethylhexyltriazone, Bisethyloxyloxyphenol, Methoxyphenyltriazine, Laurylglucoside, Triethanolamine, Sodium polyacrylate, Aloe vera Gel, Shea Butter, Calendula extract, magnesium ascorbyl phosphate, ethylhexylglycerol, benzyl alcohol, perfume.

Indications: for all skin types.

Scope: professional and home care.

How to use: Apply a sufficient amount of an even layer on the face, including the area around the eyes, neck and decollete, in 30 minutes before going out into the sun. To maintain a protective effect, repeat the application every 4-5 hours, especially when bathing, sweating or using a towel.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Sun protective SPF 50 cream

Sun protection cream with a high level of protection SPF 50 will help avoid photoaging, the appearance of dryness and tightness. A high level of absorption of ultraviolet radiation can prevent the appearance of pigment spots and protect the cellular structures of the skin from the damaging effects of UV rays. The pleasant texture of the cream makes the skin feel comfortable. The cream not only protects the skin, but also cares for it; the skin becomes velvety and well-groomed.

Ingredients: UVA\UVB chemical filter complex, aloe juice, titanium dioxide, ascorbyl palmitate, sunflower oil, lecithin, panthenol, jojoba oil, vitamin E.

Indications: for all skin types.

Scope: professional and home care.

How to use: Apply a sufficient amount of an even layer on the face, including the area around the eyes, neck and decollete, in 30 minutes before going out into the sun. To maintain a protective effect, repeat the application every 4-5 hours, especially when bathing, sweating or using a towel.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Anti-age cream with hyaluronic acid

The cream is a gentle moisturizing cosmetic that gently cares for all skin types, absorbs quickly, hydrating the skin and creating a beautiful complexion with natural radiance. Due to its composition, it has a rejuvenating effect: metabolic processes in the skin cells are activated; saturation with oxygen and beneficial substances takes place.

Ingredients: shea butter, hyaluronic acid of three molecular weights, grape seed oil, grapefruit oil, coenzyme Q10, biotin, borage oil, tocopherol.

Indications: for all skin types as a basic daily moisturizer.

Scope: professional and home care.

Mode of application:

- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- For home care: use 1-2 times a day (morning and evening). If necessary, before applying, use a serum or concentrate as recommended by your cosmetologist. The cream can be used under the tonal framework.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 60 ml, 100 ml, 250 ml, 500 ml.

Fluid after peeling and other traumatic procedures, moisturizing

Moisturizing fluid for the face has a lightweight texture. It has the lightest consistency and excellent absorption rate, which is an important feature for ensuring hydration of the skin after peels and other traumatic procedures. The rest of the product performs the functions of an ordinary cream in the care of the skin. The exclusivity of the product is provided by its patented hyalurosmooth complex. This is a natural high-molecular polysaccharide of plant origin, obtained from the seeds of the Indian plant Cassia narrow-leaved. It is a versatile active skin care ingredient. It intensely moisturizes, improves the complexion, gives the skin a glowing effect, improves the tone, elasticity of the skin, creates a protective film that retains moisture and fills fine wrinkles.

Ingredients: purified water, olive oil, shea butter (shea), macadamia oil, ammonium acryldimethyltaurate / copolymer, allantoin, patented hyalurosmooth complex, panthenol, vitamin E, organic preservatives, perfume composition.

Indications: for all skin types. Recommended for use after traumatic cosmetic procedures for all skin types; ideal for moisturizing various types of skin; the best option for summer skin care of the face, neck, decollete; the fluid base perfectly degreases the skin, regulating the separation of fat, and gives the skin a matte finish; as a base for makeup. It is absorbed completely, perfectly cares for the skin and perfectly prepares it for the further stages of the make-up.

Scope: professional and home care.

Mode of application:

- during traumatic procedures: use as a final cream after the procedure. If necessary, apply a second layer of soothing cream after peeling and cleansing with SPF 15.
- when carrying out treatments: use as a final cream after the procedure. If necessary, before applying, use a serum or concentrate as indicated.
- for home care: after thorough cleansing and toning evenly apply on the skin. Use as a basic or additional moisture. Recommended daily use of the drug 1-2 times a day.

Attention! In winter, it is strictly prohibited to apply fluid bases during the day. Due to the high content of liquids in such products, the moisture molecules remaining on the skin surface will crystallize. This will cause your skin more harm than good. If the fluid base is ideal for you and is able to eliminate the "winter" problems of the epidermis, then you need to use it in the evening.

Consumption for 1 procedure: 3 ml.

Product form: bottle with dispenser 30 ml, 50 ml, 100 ml.

Anti-age cream with retinol 0.5%

Ingredients: water, oliya avocado, oliy jojoba, retinol, polyacrylate, crosspolymer-11, phenolpropanol, propylene glycol, methylisothiazoline

Indications: active care for all skin types.

Mode of application:

- For professional care: use as a final cream.
- For home care: after cleansing and toning, apply a small amount of cream on your face (neck, décolleté) in the evening. Evenly distribute the massage movements.

Consumption for 1 procedure: 2 ml.

Product form: bottle with dispenser 30 ml, 50 ml, 100 ml, 250 ml.

Masks

- Extra moisturizing mask with fucogel, hyaluronic acid and DMAE
- Soothing mask after peeling, mesotherapy, tattoo, cosmetic cleansing, laser and other traumatic procedures
- Mask whitening
- Restoring mask
- Caring eye mask
- Natural “Magic mask”
- Curative anti-inflammatory mask
- "Anti-stress" mask soothing after peeling with spirulina
- “Adsorbent” mask soothing after peeling with kaolin
- Soothing mask
- Anti-age mask with hyaluronic acid
- Detox&Moisturizing “Magic mask” (Magic clay)
- Alginate mask for skin around the eyes with silk proteins
- Alginate mask “Skin shine” with biogold
- Alginate mask basic for face and body with seaweed

Extra moisturizing mask with fucogel, hyaluronic acid and DMAE

Double moisturizing (instant+powerful): fucogel with hyaluronic acid in combination with DMAE (natural moisturizing factor) nourishes the skin and provides a pronounced “hydro-filling” effect. The mask provides an instant effect of “beautiful skin” and returns shine and freshness to it.

Ingredients: fucogel, D-panthenol, DMAE, vitamin E, sodium hyaluronate.

Indications: anti-age care: age-related changes, dehydrated skin, violation of the lipid mantle, reduced elasticity and tone, as well as for all skin types according to indications.

Scope: professional and home care.

Mode of application:

Clear the areas on which the mask will be applied. Apply a mask (not excluding the area around the eyes). Hold for 15 to 20 minutes.

After that, massage the skin with soft movements (ultrasound can be used). The mask does not require removal of excess; it is very well absorbed into the skin. As a result, the skin becomes more elastic and taut (at your request, you can wash it off with warm water or wipe the face with a cotton pad moistened with tonic). This lightest mask does not require the removal of excess - it is simply absorbed into the skin without residue, starting the process of regeneration and the fight against free radicals. As a result, the skin becomes more elastic and taut and glows with health. This lightest mask does not require the removal of excess - it is simply absorbed into the skin without residue, starting the process of regeneration and the fight against free radicals. As a result, the skin becomes more elastic and taut and glows with health.

Consumption for 1 procedure: 5 ml.

Product form: 50 ml, 100 ml, 200 ml, 300 ml cans.

Soothing mask after peeling, mesotherapy, tattoo, cosmetic cleansing, laser and other traumatic procedures

A soothing mask is an excellent completion of the procedures of chemical peeling, microdermabrasion, laser photorejuvenation and other traumatic procedures, as well as for the purpose of rehabilitation care. It perfectly soothes, relieves irritation, normalizes blood circulation and subcutaneous metabolic processes, and has pronounced wound-healing properties.

Ingredients: calendula extract, mallow, azulene, fucogel, D-panthenol, DL - pantolactone, hyaluronic acid, carbomer, menthyl lactate, allantoin.

Indications: for all skin types according to indications.

Scope: professional and home care.

Mode of application:

Clear the areas on which the mask will be applied. Apply a mask (excluding the area around the eyes). Hold for 15 to 20 minutes. After that, gently massage the skin. The mask does not require removal of excess, it is very well absorbed into the skin (if you wish, you can wash it off with warm water or wipe your face with a cotton pad moistened with a tonic). Fight free radicals. As a result, the skin becomes more elastic and taut and glows with health. This lightest mask does not require the removal of excess - it is simply absorbed into the skin without residue, starting the process of regeneration and the fight against free radicals. As a result, the skin becomes more elastic and taut and glows with health.

Consumption for 1 procedure: 5 ml.

Product form: 30 ml, 50 ml, 100 ml, 200 ml, 300 ml, 500 ml cans.

Mask whitening

Intense cosmetic product aimed at reducing the appearance of age spots and freckles. It has an effective whitening effect on the problem areas of the skin. The active components of the mask allow you to quickly cope with pigmentation resulting from age-related changes, ultraviolet radiation and other external factors. Whitening mask helps cleanse the pores, improves the appearance and tone of the skin. Regular use of the mask will reduce the active production of the coloring pigment melanin, which leads to the formation of pigmentation on the skin.

Ingredients: purified water, almond oil, bearberry extract, Shea butter, arbutin, sesame oil, primrose oil, glycerin, ascorbic acid, kojic acid, allantoin, D-panthenol, licorice extract, tocopherol acetate, lactic acid, citric acid, perfume composition .

Indications: for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15 to 20 minutes, and then rinse with water. Repeat the procedure 1-2 times a week.

Attention! It is advisable to make a mask at night before bedtime, because after it you must not be in the sun. If you have to use a whitening mask more often, then before going outside you need to protect your face with a photoprotective cream.

Consumption for 1 procedure: 5 ml.

Product form: 50 ml, 100 ml, 200 ml, 300 ml cans.

Restoring mask

A revitalizing facial mask will effectively help restore the skin's health energy and radiant appearance. Recovery and intensive nutrition is especially necessary for our skin in the cold and avitaminosis period.

Ingredients: prepared water, peach seed oil, olive oil, chamomile oil, rosehip oil, wheat germ oil, sea buckthorn oil, panthenol, vitamin C, vitamin E, flax oil, and beta-glucain.

Indications: for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water. Repeat the procedure 1-2 times a week.

Consumption for 1 procedure: 5 ml.

Product form: 30 ml, 50 ml, 100 ml, 200 ml, 300 ml, 500 ml cans.

Caring eye mask

Gentle and comfortable texture of the mask allows you to instantly give the skin around the eyes a rested appearance. The mask effectively nourishes refreshes, has anti-edema and anti-aging effect, reduces swelling and dark circles under the eyes, softens, and reduces inflammation. This product is indispensable for tired, devitalized and dry skin around the eyes.

Ingredients: green tea extract, white tea extract, ginseng extract, glycerin, allantoin, sodium hyaluronate, alpha glycosyl hesperin, D-panthenol, nicotinamide, ascorbic acid, sodium ascorbate, Haloxyl complex, tea tree essential oil.

Indications: for all skin types according to indications.

Scope: professional and home care.

How to use: apply a mask on a well-cleaned area around the eyes. Leave on for 15-20 minutes, then gently remove the mask residue with a damp cotton pad or rinse with warm water. Further, if necessary, continue the day or night skin care procedures. Repeat the procedure 1-2 times a week.

Consumption for 1 procedure: 2 ml.

Product form: bottle with 60 ml, 100 ml, 250 ml dispenser.

Natural “Magic mask”

Mask based on yogurt. Amino acids contained in yoghurt have excellent moisturizing properties. And lactic acid works like a natural scrub, perfectly removing dead and horny skin cells. And do not forget about the content of vitamins B and C, which are well absorbed by skin cells. The rejuvenating, refreshing, regenerating mask of yogurt for the face will allow your skin to shine with beauty and youth.

Ingredients: natural yoghurt.

Indications: for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water. Repeat the procedure 1-2 times a week. Daily wiping the face with a cotton pad dipped in yogurt perfectly cleanses and nourishes the skin, improving the complexion.

Consumption for 1 procedure: 3 ml.

Release form: bottle of 50 ml, 100 ml.

Curative anti-inflammatory mask

The therapeutic anti-inflammatory face mask shows high activity against pathogenic bacteria, has anti-inflammatory, bactericidal and resorbing action, normalizes the work of sebaceous glands, restores the broken lipid barrier and neutralizes the action of free radicals. The mask has both healing and sedative effects after mechanical cleaning and other traumatic procedures, as well as for the purpose of rehabilitation care.

Ingredients: bodyagi extract, Shea butter, sulfur derivatives, black cumin oil, bischofite, calendula extract, celandine extract, zinc oxide, triclosan, camphor, chlorophyllipt, succession extract, allantoin, panthenol.

Indications: problematic, skin prone to inflammation, care after aggressive procedures, as well as for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water.

Consumption for 1 procedure: 5 ml.

Product form: 30 ml, 50 ml, 100 ml, 200 ml, 300 ml, 500 ml cans.

"Anti-stress" mask soothing after peeling with spirulina

After chemical peeling, the skin needs special, delicate care. It needs to be gently nourished, softened and reassured. A soothing face mask with spirulina includes the highest quality ingredients that instantly soften and soothe the skin. The mask eliminates irritation, redness, relieves signs of fatigue.

Ingredients: soybean paste (soy isoflavones, soy genestein) D-panthenol, 20% spirulina.

Indications: care after aggressive procedures, as well as for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water.

Consumption for 1 procedure: 5 ml

Product form: 50 ml, 100 ml, 300 ml cans.

Adsorbent mask soothing after peeling with kaolin

The mask, soothing with kaolin, removes toxins from the cells, cleans the pores of skin "debris" in the form of dead cells, sebaceous deposits, atmospheric pollution. Effectively soothes irritated, inflamed skin. It has anti-inflammatory effect, eliminating acne and blackheads. Eliminates greasy shine on the surface of oily skin, dries it, and narrows enlarged pores.

Ingredients: soybean paste (soy isoflavones, soy genestein) D-panthenol, 20% kaolin.

Indications: problematic, skin prone to inflammation and pigmentation, care after aggressive procedures, as well as for all skin types according to indications.

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water.

Consumption for 1 procedure: 5 ml

Product form: 50 ml, 100 ml, 300 ml cans.

Soothing mask

The mask is effective in the care of problem skin and is useful as a “blocker” of the enzyme that stimulates the production of sebum. In addition, it has a rejuvenating, moisturizing, anti-aging, anti-inflammatory and antioxidant effect.

Ingredients: soybean paste (soy isoflavones, soy genestein) D-panthenol.

Indications: problem skin with age-related changes, acne prevention and post-acne, enlarged pores, and also for all skin types according to indications

Scope: professional and home care.

Method of application: apply a mask in a dense layer on previously cleansed skin, avoiding the area around the eyes. Leave the mask on the face for 15-20 minutes, and then rinse with water.

Consumption for 1 procedure: 5 ml.

Product form: 50 ml, 100 ml, 300 ml cans.

Anti-age mask with hyaluronic acid

Highly effective cosmetic in anti-age care: deeply moisturizes, helps to maintain elasticity and even out skin texture. The mask also provides additional, pleasant bonuses in the form of a gorgeous complexion, healing of inflammations, acne and acne.

Ingredients: capril triglycerides, soybean oil, tocopherol, hyaluronic acid of three molecular weights, sunflower extract, lemon extract, soap extract, mycelia, ascorbyl palmitate.

Indications: anti-age care: age-related changes, dehydrated skin, a violation of the lipid mantle, a decrease in elasticity. Problem skin, care after aggressive procedures, as well as for all skin types according to indications.

Scope: professional and home care.

The mask nourishes and nourishes the skin with essential vitamins, amino acids, proteins and mineral salts. It normalizes the hydrobalance in the tissues, helps to retain moisture in the skin, eliminates dryness, improves appearance, and removes signs of fatigue.

Ingredients: an alginate complex from seaweed.

Indications: for all skin types according to indications.

Scope: professional care.

Consumption for 1 procedure: 25 g.

Release form: sachet 25 g, 150 g, 200 g, 500 g, 1000 g.

Carboxytherapy

- Carboxy-gel Step I
- Carboxy-gel Step II

CARBOXYTHERAPY

Carboxytherapy or CO₂-therapy is a technique for restoring intracellular respiration of the skin. It is a non-injectable transdermal injection of carbon dioxide under the skin, obtained by mixing certain ingredients.

The procedure involves using the original mask. The main component of this mask is carbon dioxide. Carbon dioxide is formed by mixing the carboxytherapy gels Step I and Step II. Molecular CO₂ very quickly penetrates the skin and reaches the blood vessels, expanding them. As a result, blood circulation increases, skin cells receive an additional dose of oxygen, their metabolism increases. This, in turn, stimulates the production of collagen – and therefore there is a natural face lift, skin color improves and becomes healthy and fresh.

This procedure is very comfortable and does not injure the skin. It is suitable for all skin types, not seasonal.

Indications: for all types of skin of the face (excluding the area around the eyes), neck, and neckline.

Scope: professional care.

CARBOXYTHERAPY GELS

Carboxy-Gel Step I pH 8.2 (gel Lite)

Purpose: the opening of pores, loosening of the stratum corneum.

Ingredients: sodium bicarbonate, chamomile extract.

Consumption for 1 procedure: 10 ml

Release form: bottle of 100 ml.

Carboxy-Gel Step II pH 3.2-3.4 (gel Lite)

Purpose: activation of CO₂ emissions, increased excretion of protein metabolites from the skin, deoxidation, vasodilation, thermal effect.

Ingredients: bilberry extract, sugar cane extract, lactic acid, citric acid, orange extract, glycolic acid, glycerin.

Consumption for 1 procedure: 10 ml

Release form: bottle of 30 ml, 50 ml, 100 ml.

Set. Carboxy-Gel Step I pH 8.2 + Step II pH 3.2-3.4 (Lite gels)

Product form: 50 ml bottle, set for carboxytherapy Step I, Step II - 2 bottles (10 procedures).

Mode of application:

Step I: opening of the pores, loosening of the stratum corneum.

- Use Carboxy- Gel Step I. Apply 10 ml of the gel with a brush to the face and neck, excluding the area around the eyes. Apply a pre-prepared gauze cloth (cloth mask) on the face and neck. Press it tightly onto the skin and saturate it with phase I gel.

Step II: activation of CO₂ emissions, increased excretion of protein metabolites from skin, detoxification, expansion of blood vessels, thermal effect.

- Use Carboxy-Gel Step II immediately after applying Phase I. Apply 5 ml of gel on the face and neck over the fabric mask (second layer) in the following order: forehead, chin, cheeks, temples, neck, nose, area around lips. Exposure 10-15 minutes. You can enhance the procedure by applying low-frequency ultrasound micro-massage for 3-5 minutes.
- Remove the fabric mask; remove the remnants of the drug with cool water.

When applied, there is a characteristic hiss and foaming, which product the release of CO₂. The client may feel warm and tingling. If you experience significant discomfort, you should stop the application and wash off the drug with plenty of cool water.

Attention! If significant discomfort occurs, stop the application and rinse with plenty of cool water!

Carboxytherapy with dense gels

Carboxy-Gel Step I pH 8.2 (dense gel)

Purpose: the opening of pores, loosening of the stratum corneum.

Ingredients: sodium bicarbonate, chamomile extract.

Consumption for 1 procedure: 10 ml

Release form: bottle of 60 ml.

Carboxy-Gel Step II pH 3.2-3.4 (dense gel)

Purpose: activation of CO₂ emissions, increased excretion of protein metabolites from the skin, deoxidation, vasodilation, thermal effect.

Ingredients: bilberry extract, sugar cane extract, lactic acid, citric acid, orange extract, glycolic acid, glycerin.

Consumption for 1 procedure: 5 ml

Release form: 30 ml bottle, set for carboxytherapy Step I + Step II - 2 bottles (6 procedures).

Set. Carboxy-Gel Step I pH 8.2 + Step II pH 3.2-3.4 (dense gels)

Mode of application:

- Use Step I Carboxy-Gel. Apply 10 ml of the gel with a brush to the face and neck, excluding the area around the eyes. **Step II: activation of CO2 emissions, increased excretion of protein metabolites from the skin, detoxification, vasodilation, thermal effect.**
- Use Step II Carboxy-Gel immediately after applying Step I. Apply 5 ml of the gel with the second layer (on top of Step I gel) on the face and neck in the following sequence: forehead, chin, cheeks, temples, neck, nose, lip area. Exposure 10 minutes;
- Remove residual preparation with cool water.

When applied, there is a characteristic hiss and foaming, which product the release of CO2. The client may feel warm and tingling. If you experience significant discomfort, you should stop the application and wash off the drug with plenty of cool water.

Attention! If significant discomfort occurs, stop the application and rinse with plenty of cool water!

Products for depilation and sugaring

- Pain reliever before depilation
- Fluid-cream after depilation regenerating
- Gel-fluid after sugaring
- Folistop - fluid against hair ingrowth
- Fluid against hair ingrowth “Extra”
- Sugar paste “Extra”
- Sugar paste ”Medium”
- Sugar paste ”Soft”
- Sugar paste “Extra Soft” for bandage equipment
- Talc for depilation hypoallergenic
- Talc for depilation soothing
- Talc for depilation cooling

Pain reliever before depilation

The product is intended for preliminary preparation of the skin for depilation. The composition includes ingredients that help improve hair extraction. Also it includes components that allow you to soothe the surface layers of the skin and thus depilation is painless. The product includes only natural substances and AHA acids, which allows calling it hypoallergenic.

Ingredients: aloe vera extract, camomile extract, lactic acid glycerin, chlorhexidine.

How to use: apply 2-5 ml (1-2 clicks of the dispenser) to the previously cleansed skin, rub in with massaging movements, and let the agent soak completely. It must be borne in mind that all. Depilation types are carried out only on dry skin; therefore, it is necessary to dry the remnants of moisture with a dry cloth, then apply talcum powder and only after that you can start the procedure of sugaring.

Consumption for 1 procedure: 5 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Fluid-cream after depilation regenerating

Cream is intended for the treatment of the skin after the procedure of hair removal from the body as waxing (wax) and sugaring (sugar). The product contains a rich collection of oils, vitamins and AHA acids, which perfectly soothe, nourish and regenerate the skin. When applying this product after waxing, one should keep in mind that it perfectly removes wax residues (sticking). “Fluid-cream after depilation” is hypoallergenic, since only natural components are included in the product.

Ingredients: jojoba oil, Shea butter, papain, almond oil, tea tree oil, vitamin E, bergamot oil, vitamin A, allantoin.

Scope: professional and home care.

How to use: Apply the product to the skin area (1-2 clicks of the dispenser) and rub in with soft massage movements until lightly absorbed. If it is necessary to remove the stuck wax, it is necessary to apply the agent to the place of the stuck, leave for 5-10 minutes and then remove the remnants with a napkin.

Consumption for 1 procedure: 5 ml

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Gel-fluid after sugaring

Gel-fluid is intended for treating the skin after the procedure of hair removal from the body with a sugaring (sugar). The main quality of the product is a quick and effective calming, overexcited skin after hair removal. Natural herbal extracts, vitamins and AHA acids, which are part of the product, not only perfectly soothe, but also moisturize, nourish and regenerate the skin. “Shunting agent” is hypoallergenic, and since the product contains only natural ingredients.

Ingredients: glycerin, peppermint extract, camomile extract, aloe vera extract, D-panthenol, kelp extract, caffeine, glycerin, benzyl nicotinate, tannin, rutin, allantoin.

Scope: professional and home care.

How to use: Apply the product to the skin area (1-2 clicks of the dispenser) and rub in with soft massage movements until lightly absorbed.

Consumption for 1 procedure: 5 ml.

Product form: bottle with dispenser 100 ml, 250 ml, 500 ml.

Folistop – fluid against hair ingrowth

If you have a genetic predisposition to hair ingrowth after depilation, the Fluid against hair growth problem will help you to get rid of this problem. This product is designed to retard growth and facilitate the release of weakened young hair on the skin surface. The composition of the product is selected to influence the density of the conjugation of epidermal cells. When the epidermal cells under the action of the components of the product become softer, it is easier for the hair to grow to the surface of the skin and the effect of ingrowth is excluded.

Ingredients: purified water, willow bark extract, walnut extract, chamomile extract, panthenol, copolymer, azelaic acid, tannin, rutin, menthol, allantoin, tocopherol acetate.

Method of application: after depilation on the skin where the hair grows, locally rub the product daily until the hair grows onto the surface (1-2 weeks). Apply product only on the cleared and moistened skin.

Scope: professional and home care.

Consumption for 1 procedure: 1-3 ml one area of ingrowth.

Product form: bottle with dispenser 60 ml, 100 ml, 250 ml, 500 ml.

Fluid against hair ingrowth extra

If you have a genetic predisposition to hair ingrowth after depilation, the Fluid against hair growth problem will help you to get rid of this problem. This product is designed to retard growth and facilitate the release of weakened young hair on the skin surface. The composition of the product is selected to influence the density of the conjugation of epidermal cells. When the epidermal cells under the action of the components of the product become softer, it is easier for the hair to grow to the surface of the skin and the effect of ingrowth is excluded.

Ingredients: purified water, willow bark extract, walnut extract, chamomile extract, panthenol, copolymer, azelaic acid, tannin, rutin, menthol, allantoin, tocopherol acetate.

Hair care products

- Placental serum against hair loss
- Moisturizing hair balm
- Shampoo-gel for normal hair

Placental serum against hair loss

Placental serum for strengthening and growing hair is an effective universal formula for restoring the health of hair roots and caring for them. Serum strengthens thin and brittle hair, eliminates dryness and accelerates hair growth. The hydrolysates in the serum composition stimulate blood circulation and secrete hairs, useful substances that promote the regeneration of hair cells, the elimination of fragility and delamination of the hair structure. Vitamins that have placental serum saturate the hair, have a healing effect, and vegetable natural proteins prevent hair from splitting and stop its loss.

Indications: for all hair types.

Ingredients: purified water, glycerin, lavender hydrolyzate I, distillation hydrolate, porcine placenta, vegetable protein hydrolyzate, beta glucan from oats, keratin hydrolyzate, vitamin PP, B5.

Scope: professional and home care.

Method of application: application of serum to the previously washed scalp, here are light massaging movements. Do not flush. Apply 2-3 times a week.

Consumption for 1 procedure: 4 ml

Release form: bottle of 10 ml, 25 ml, 50 ml.

Moisturizing hair balm

Moisturizing balm provides intensive hydration and protection from negative external influences. Additional advantage of cosmetic is a pronounced conditioning effect.

Indications: for all hair types.

Ingredients: Shea butter, argan oil, coconut oil, burdock extract, silk proteins, lactic acid, citric acid.

Scope: professional and home care.
